## **Embracing Cancer Immunotherapy with Vital Micronutrients**

Cancer Immunotherapy with Micronutrients

16 June 2021

Dear Reviewer,

Many thanks for undertaking a very comprehensive review of our article. It is our dedicated effort in a perhaps rather belated attempt to integrate vital micronutrients in convention oncology when trying to solve the old deadlock of immuno-resistance and immune-related adverse events. If our article can stimulate fellow researchers' interest in further investigating the clinical benefit of such micronutrients in immunotherapy, our effort is worth it, and the goal of this paper may well have been achieved.

Your positive remarks will definitely encourage us to undergo further reviews and other related research on this topic and we hope we could see a breakthrough in the very near future.

Best wishes,

Authors

Raymond C-F Yuen, Shiu-Ying Tsao
