Current status of liver transplantation for cholangiocarcinoma

<https://pubmed.ncbi.nlm.nih.gov/29024405>

Cholangiocarcinoma (CCA) is the second most common liver cancer, and it is associated with a poor prognosis. CCA can be divided into intrahepatic, hilar, and distal. Despite the subtype, the median survival is 12-24 months without treatment. Liver transplantation (LT) is recognized worldwide as a cu

Liver Transplantation for Cholangiocarcinoma: Insights ...

<https://link.springer.com/article/10.1007/s11912-020-00910-1> ▾

Apr 16, 2020 · A multimodal treatment approach, including liver transplantation (LT) for select patients with unresectable CCA, should be considered. While currently only an approved indication for early, liver-limited, perihilar cholangiocarcinoma, promising results have been achieved for LT in localized intrahepatic disease.

LIVER TRANSPLANT FOR CC – Cholangiocarcinoma ...

<https://cholangiocarcinoma.org/db/topic/liver-transplant-for-cc>

Apr 22, 2010. "LIVER TRANSPLANTATION Liver transplantation without neoadjuvant therapy should be avoided in patients with hilar cholangiocarcinoma, with long-term patient survival in the range of 28% at 5 years and a prohibitively high recurrence rate.38 Results are equally disappointing with incidental tumors.39,40
