Abstract

Background

Prioritisation in The Context ...

Challenges of

Africa is the second most populous continent after Asia comprising 54 **countries**. Given the healthcare system deficiencies in Africa, the impact of the **COVID-19 pandemic** was expected to be disastrous. The first case of COVID-19 on the continent was reported in Egypt on 14 February 2020. By 13 May, cases had been reported in all 54 **countries**. Several **practice** guidelines specific to **radiation oncology** departments have been published, including prioritisation criteria for postponing radiotherapy, continuat...
