Wilms Tumor and Other Childhood Kidney Tumors ...

<https://www.cancer.gov/types/kidney/patient/wilms-treatment-pdq>

Jun 15, 2021 - Childhood kidney tumors are diseases in which malignant (cancer) cells form in the tissues of the kidney. There are two kidneys, one on each side of the spine, above the waist. Tiny tubules in the kidneys filter and clean the blood. They take out waste products and make urine. The urine passes from each kidney through a long tube called a ureter into the bladder.
