SPECIFIC COMMENTS TO AUTHORS

The article is within the scope of the journal. However, it cannot be accepted if some improvements are not made: a) In the abstract it is not clear what is the objective and the contribution of the article. b) The article is not well structured. A structure such as: Introduction, Materials, Methods, Results, Discussion and Conclusions should be used. c) The article has no cohesion in the presentation of the results. d) The style of the article should be improved. For example there are different line spacing. The text is not justified.

SPECIFIC COMMENTS TO AUTHORS

In this research, authors reported different options for management of neurogenic bladder dysfunction in pediatric population. Here, management options were reported based on physiopathological mechanisms. Authors provided a well structured report with good language quality. Well done.
