SPECIFIC COMMENTS TO AUTHORS

The paper concerns an interesting matter- The azoles are comprised in the protocol of the post transplant treatment. The manuscript is well structured and all sections are completely organized. I recommend to add in the discussion the potential drug-drug interactions of these compounds with other coadministered drugs (see Effects of voriconazole on tacrolimus metabolism in a kidney transplant recipient. J Clin Pharm Ther. 2010 Feb;35(1):121-4 and Effects of itraconazole on tacrolimus blood concentrations in a renal transplant recipient. Ann Pharmacother. 1999 Oct;33(10):1124-5).
