SPECIFIC COMMENTS TO AUTHORS

The Manuscript Number 68442 titled "Phenomenology of Obsessive-Compulsive Disorder In Children and Adolescents: Sample From A Tertiary Care Center In Istanbul, Turkey" represent an original retrospective study aimed at at evaluating clinical and socio-demographic variables among a large sample of adolescents and children affected by OCD. I have only one comment: given the modality of sample recruitment could the Authors add information regarding how many subjects refuse to participate to the study research? This information may ameliorate the overall quality of the paper.
