

Reponses to Reviewers

“The two major subfields used of AI used in medicine are Machine Learning (ML) and Deep Learning (DL)” is well written. “when large amounts of data is required it has its own challenges” is not correct in grammar. “machines models” is not correct in grammar. Following recently published PRISMA Extension for Scoping Reviews (PRISMA-ScR): Checklist Ann Intern Med. 2018, there are several items that will help standardized this excellent Scoping Reviews - Introduction: Please summarize rationale/and add objectives of this review to help readers follow this review easier. - Before conclusion, if possible, please provide limitations of current evidence/scoping reviews and potential implications and/or next steps. - Need figures and tables to summarize

Thanks for your time and precious input.

All grammatical errors have been carefully revised. We have added some additional details to the revised manuscript.

However, as it is a mini review following/ adhering to PRISMA guidelines is not the desired approach.

Revision of the English language is still needed. There are some parts of the paper where it is quite difficult to make sense of some sentences English edit will help to improve the quality of the manuscript.

All grammatical errors have been carefully revised again.
