	General Information of the Manuscript	
	Name of journal: World Journal of Surgical Procedures	
	Manuscript NO.: 69147	
	Column: Case Report	
	Title: Theco-thecal bypass technique: a case report elucidating a	[Y]
1	novel procedure and perspective on the treatment of post	
L	arachnoiditis syringomyelia	
	Authors: Mrudul Bhatjiwale and Mohinish Bhatjiwale	
	Reviewer code: 05219083	
	First decision: 2021-09-02 06:34	
	Scientific Editor: Ji-Hong Liu	
	Date of signature: <u>2021/12/10</u> (month/day/year)	
2	Editorial Office's Comments	[Y]

	Science Editor: Manuscript_FirstCommentByScienceEditor	
	Company Editor-in-Chief: I have reviewed the Peer-Review	
	Report, full text of the manuscript, and the relevant ethics	
	documents, all of which have met the basic publishing requirements	
	of the World Journal of Surgical Procedures, and the manuscript is	
	conditionally accepted. I have sent the manuscript to the author(s)	
	for its revision according to the Peer-Review Report, Editorial	
	Office's comments and the Criteria for Manuscript Revision by	
	Authors. Please provide the original figure documents. Please	
	prepare and arrange the figures using PowerPoint to ensure that all	
	graphs or arrows or text portions can be reprocessed by the editor.	
3	The fixed headings are copied.	[Y]
	The title concisely summarizes the main topic of the study and is	
	not too long (no more than 18 words). Words such as 'exploration',	
4	'research', 'analysis', 'observation', and 'investigation' are avoided.	[Y]
	The title does not start with 'The' and does not include any Arabic	
	numbers or uncommon abbreviations.	
5	A short running title is provided (no more than 6 words).	[Y]
	The authors' full family (sur)names and full/abbreviated first	
6	names are listed on the title page and are consistent with those	[Y]
	listed in the signed BPG Copyright License Agreement form.	
	The 'Author contributions' passage describes the specific	
	contribution(s) made by each author. The author's names are listed	
	in the following format: full family (sur)name followed by	
7	abbreviated first and middles names.	[Y]
	<i>e.g.,</i> "Wang CL and Liang L contributed equally to this work; Wang	L * J
	CL, Liang L, Fu JF, Zou CC, Hong F and Wu XM designed the	
	research study; Wang CL, Zou CC, Hong F and Wu XM performed	
	research study, stang CD, Zou CC, Hong F and Wu Alvi perioritieu	

	the research; Xue JZ and Lu JR contributed new reagents and analytic tools; Wang CL, Liang L and Fu JF analyzed the data; and Wang CL, Liang L and Fu JF wrote the manuscript. All authors have read and approve the final manuscript."	
8	The 'Supported by' statement describes the source(s) of financial support and includes the corresponding identification number(s) and program ID(s) if available, and contains no spelling errors.	[N]
9	The 'Corresponding author' passage provides the corresponding author's full first and family (sur)names, abbreviated title ( <i>e.g.</i> , MD, PhD), affiliated institute's name and complete postal address (including zip code) and e-mail (written in all lowercase), and contains no spelling errors.	[Y]
10	The Manuscript Tracking information ( <i>i.e.</i> , Received, Peer review started, First decision, Revised, Accepted, Article in press, and Published online) are provided along with the corresponding editor and date for each item, and contain no spelling errors.	[Y]
11	The Abstract section is formatted according to the article-specific style (structured <i>vs</i> unstructured) and word count thresholds, as follows: <u>Commentary, Frontier, Diagnostic Advances, Medical Ethics,</u> <u>Minireview, Review, Therapeutics Advances, and Topic Highlight</u> : Non-structured abstract that is no less than 200 words. <u>Field of Vision, Case Report and Letter to the Editor</u> : Non-structured abstract that is no less than 150 words. <u>Research articles</u> : Structured abstract with subsections for AIM (no more than 20 words); METHODS (no less than 80 words); RESULTS (no less than 120 words); and CONCLUSION (no more than 26	[Y]

	words).	
	The 'Key words' list provides 5-10 keywords that reflect the main	
12	content of the study. The first letter of each keyword is capitalized,	[Y]
	and each keyword is separated by a semicolon.	
	The "citation" contains authors' names and manuscript title. The	
	name of the first author should be typed in bold letters; the family	
	(sur) name of all authors should be typed with the first letter	
	capitalized, followed by their abbreviated first and middle initials.	
13	For example, an article by Jae Moon Yoon, Ki Young Son, Chun Sick	[Y]
	Eom, Daniel Durrance, Sang Min Park will be written as Yoon JM,	
	Son KY, Eom CS, Durrance D, Park SM. Pre-existing diabetes	
	mellitus increases the risk of gastric cancer: A meta-analysis. World J	
	Gastroenterol 2019; In press	
	The 'Core tip' provides a summary (less than 100 words) of the	
14	study that outlines the most innovative and important arguments	EN 1
14	and core contents of the paper and will serve to effectively attract	[Y]
	readers.	
	The 'INTRODUCTION' section clearly describes the relevant	
	background information for the study. Only the most relevant and	
	current (within the past 5 years) literature is cited, with the	
	exception of rare instances of seminal literature citations. All	
	technical terms and/or abbreviations are explained and/or defined,	
15	with the full name of abbreviations given upon first appearance in	
15	the text and the abbreviation presented in parentheses [i.e.,	[Y]
	"computed tomography (CT)"]. First-person pronouns (e.g., 'I',	
	'we') are used appropriately to clearly indicate the work performed	
	by the author(s). When weaknesses of previous studies are	
	described in the text to highlight the innovations related to the	
	current study, the information is presented carefully.	

16The 'MATERIALS AND METHODS' section clearly and accurately describes all materials and methods used to obtain the data presented in the article and is adequate for a reader to repeat the study.[N]16The 'RESULTS' section concisely describes the observational and experimental results. Representative data and data that have scientific significance are emphasized. Data is presented in either the text, a table or figure ( <i>i.e.</i> , chart, diagram, graph or image), but is not repeated among each. Information presented in the tables and figures clearly describes the trends, meaning, and inferences. Results described in textual form are accurate, concise and clear.[N]18Statistical symbols are accurate. Statistical significance is expressed as *P < 0.05, *P < 0.01 (P > 0.05 usually does not need to be denoted). If there are other series of P values, sep < 0.05 and 4P < 0.01 are used, and a third series of P values is expressed as *P < 0.05 and iP < 0.01. Statistical data is expressed as mean ± SD or mean ± SE.[N]19The 'DISCUSSION' section (1) describes the most important results; (3) illustrates and explains the results (but does not simply repeat the data) and draws conclusions or inferences based on the results; (4) points out the limitations of the study and their impact on the results, as well as proposes further advice on future research topic(s) or direction(s); and (5) describes the theoretical significance and practical value of the findings.[Y]20The 'ACKNOWLEDGEMENIS' section expresses gratitude to any individuals or organizations for technical support ( <i>i.e.</i> , providing instrumentation, equipment or experimental materials, and/or assistance in experimental work), non-technical services ( <i>i.e.</i> , useful inspiration, suggestions, guidance, or review), and/or			
16presented in the article and is adequate for a reader to repeat the study.[N]17The 'RESULTS' section concisely describes the observational and experimental results. Representative data and data that have scientific significance are emphasized. Data is presented in either the text, a table or figure ( <i>i.e.</i> , chart, diagram, graph or image), but is not repeated among each. Information presented in the tables and figures clearly describes the trends, meaning, and inferences. Results described in textual form are accurate, concise and clear.[N]18Statistical symbols are accurate. Statistical significance is expressed as °P < 0.05, <sup>b</sup> P < 0.01 (P > 0.05 usually does not need to be denoted). If there are other series of P values, 'P < 0.05 and 'P < 0.01 are used, and a third series of P values is expressed as "P < 0.05 and 'P < 0.01. Statistical data is expressed as mean ± SD or mean ± SE.		The 'MATERIALS AND METHODS' section clearly and accurately	
presented in the article and is adequate for a reader to repeat the study.The 'RESULTS' section concisely describes the observational and experimental results. Representative data and data that have scientific significance are emphasized. Data is presented in either the text, a table or figure ( <i>i.e.</i> , chart, diagram, graph or image), but is not repeated among each. Information presented in the tables and figures clearly describes the trends, meaning, and inferences. Results described in textual form are accurate, concise and clear.[N]18Statistical symbols are accurate. Statistical significance is expressed as $^{eP} < 0.05$ , $^{bP} < 0.01$ ( $P > 0.05$ usually does not need to be denoted). If there are other series of $P$ values, $P < 0.05$ and $^{4}P < 0.01$ are used, and a third series of $P$ values is expressed as $^{eP} < 0.05$ and $^{iP} < 0.01$ . Statistical data is expressed as $mean \pm 5D$ or mean $\pm 5E$ .[N]19The 'DISCUSSION' section (1) describes the most important results; (3) illustrates and explains the results (but does not simply repeat the data) and draws conclusions or inferences based on the results; (4) points out the limitations of the study and their impact on the results, as well as proposes further advice on future research topic(s) or direction(s); and (5) describes the theoretical significance and practical value of the findings.[Y]20The 'ACKNOWLEDGEMENTS' section expresses gratitude to any individuals or organizations for technical services ( <i>i.e.</i> , useful inspiration, suggestions, guidance, or review), and/or any other[Y]	16	describes all materials and methods used to obtain the data	[ N] ]
17The 'RESULTS' section concisely describes the observational and experimental results. Representative data and data that have scientific significance are emphasized. Data is presented in either the text, a table or figure ( <i>i.e.</i> , chart, diagram, graph or image), but is not repeated among each. Information presented in the tables and figures clearly describes the trends, meaning, and inferences. Results described in textual form are accurate, concise and clear.[N]18Statistical symbols are accurate. Statistical significance is expressed as *P < 0.05, *P < 0.01 (P > 0.05 usually does not need to be denoted). If there are other series of P values, *P < 0.05 and 4P < 0.01 are used, and a third series of P values is expressed as set < 0.05. Statistical data is expressed as mean ± SD or mean ± SE.[N]19The 'DISCUSSION' section (1) describes the main purpose and hypothesis of the study; (2) summarizes the most important results; (3) illustrates and explains the results (but does not simply repeat the data) and draws conclusions or inferences based on the results; (4) points out the limitations of the study and their impact on the results, as well as proposes further advice on future research topic(s) or direction(s); and (5) describes the theoretical significance and practical value of the findings.[Y]20The 'ACKNOWLEDGEMENTS' section expresses gratitude to any individuals or organizations for technical support ( <i>i.e.</i> , providing instrumentation, equipment or experimental materials, and/or assistance in experimental work), non-technical services ( <i>i.e.</i> , useful inspiration, suggestions, guidance, or review), and/or any other	10	presented in the article and is adequate for a reader to repeat the	
experimental results. Representative data and data that have scientific significance are emphasized. Data is presented in either the text, a table or figure ( <i>i.e.</i> , chart, diagram, graph or image), but is not repeated among each. Information presented in the tables and figures clearly describes the trends, meaning, and inferences. Results described in textual form are accurate, concise and clear.[N]18Statistical symbols are accurate. Statistical significance is expressed as *P < 0.05, *P < 0.01 (P > 0.05 usually does not need to be denoted). If there are other series of P values, *P < 0.05 and *P < 0.01 are used, and a third series of P values is expressed as *P < 0.05 and *P < 0.01. Statistical data is expressed as mean ± SD or mean ± SE.[N]19The 'DISCUSSION' section (1) describes the main purpose and hypothesis of the study; (2) summarizes the most important results; (3) illustrates and explains the results (but does not simply repeat the data) and draws conclusions or inferences based on the results; (4) points out the limitations of the study and their impact on the results, as well as proposes further advice on future research topic(s) or direction(s); and (5) describes the theoretical significance and practical value of the findings.[Y]20The 'ACKNOWLEDGEMENTS' section expresses gratitude to any individuals or organizations for technical support ( <i>i.e.</i> , providing instrumentation, equipment or experimental materials, and/or assistance in experimental work), non-technical services ( <i>i.e.</i> , useful inspiration, suggestions, guidance, or review), and/or any other[Y]		study.	
17scientific significance are emphasized. Data is presented in either the text, a table or figure ( <i>i.e.</i> , chart, diagram, graph or image), but is not repeated among each. style. This style uses Arabic numeral in-text citations based on the order of the first appearance of a source in the text. For citations where the author's name is indicated in the text, a superscript	
order of the first appearance of a source in the text. For citations where the author's name is indicated in the text, a superscript	
where the author's name is indicated in the text, a superscript	
number should be placed following the name ( <i>i.e.</i> , "Pang <i>et al</i> "). For	
citations where no author is indicated, a superscript number should	
be placed at the end of the sentence. Respective examples are: "Ma <sup>[1]</sup> [Y]	]
reported,", "Pan et al <sup>[2-5]</sup> indicated"; "PCR has a high	
sensitivity <sup>[6,9]</sup> ." No superscript numbers are used when the	
reference number is described in the text; for example, "The	
experimental method used has been described in reference [8]." The	
style of reference citations in tables is the same as that in the text	
( <i>e.g.</i> , Pan <i>et al</i> <sup>[2-5]</sup> , please see reference [8]).	
Journal references have been verified to ensure that there are no	
duplicate references and that the PMID numbers are correct. For	
references not yet included in PubMed: the name of Chinese	
journals is spelled out using Chinese Pinyin, with the first letter of	
each word capitalized ( <i>e.g., Shijie Huaren Xiaohua Zazhi</i> ); the name of	]
journals in other languages are listed according to indexing	
information retrieved from Google. Book references are presented	
with all the information relevant to the electronic version.	
The number of cited references is appropriate for the article type, as	
follows:	
<u>Commentary:</u> no less than 50;	[Y]
24 [Y] <u>Review:</u> no less than 100;	
<u>Article:</u> no less than 30/26;	
Case Report and Letter to the Editor: no less than 1.	

25The ethics-related statements are provided in accordance with the manuscript type (e.g., Manuscript No-Institutional review board statement, Manuscript No-Animal care and use statement, etc.).[N]26The names of the peer reviewers and the scientific editor are present at the end of the paper (e.g., P-Reviewer: Hugot D S-Editor: Wang JL).[Y]27The order and numerical labeling of tables and figures is consistent with their appearance and presentation in the text. Symbols in tables (e.g., +, -, ×, +, *) correctly correspond to the definitions in the footnotes. Only one legend is provided for each multi-panel figure consisting of color graphs, black and white graphs, or line graphs that depicts data of the same theme. For example: Figure 1 Pathological changes in atrophic gastritis tissue before and after treatment. A:; B:; C:; D:; E:; F:[Y]28Split pictures include flow charts, line graphs, histograms, and graphs including text. Unsplit pictures include meta-analysis diagrams, PCR amplification curves, and survival curves.[Y]30The responses to the peer-reviewers' comments.[Y]31The revised manuscript is provided (file name: Manuscript No-Review; e.g., 870-Review). The letter of peer-reviewers' comments is provided (file name: Manuscript NoPeer-review(s); e.g., 870-Paer-review(s). The response letter is provided (file name: Manuscript No-Answering reviewers; e.g., 870-Answering reviewers).[Y]32The related ethics and relevant documents are provided, such as (1) Approved grant application form(s) or funding agency copy of any Approved grant application form(s) or funding agency copy of any[Y]	25manuscript type (e.g., Manuscript NoInstitutional review board statement, Manuscript NoAnimal care and use statement, etc.).[N]26The names of the peer reviewers and the scientific editor are present at the end of the paper (e.g., P-Reviewer: Hugot D S-Editor: Wang JL).[Y]26The order and numerical labeling of tables and figures is consistent with their appearance and presentation in the text. Symbols in tables (e.g., +, -, ×, ÷, *) correctly correspond to the definitions in the footnotes. Only one legend is provided for each multi-panel figure consisting of color graphs, black and white graphs, or line graphs[Y]	
statement, Manuscript NoAnimal care and use statement, etc.).26The names of the peer reviewers and the scientific editor are present at the end of the paper (e.g., P-Reviewer: Hugot D S-Editor: Wang JL).[Y]27The order and numerical labeling of tables and figures is consistent with their appearance and presentation in the text.
