

Language Editing Certificate

This is to certify that the manuscript titled **Connective Tissue Growth Factor Expression Hints at Aggressive Nature of Colorectal Cancer** was edited for English language usage, grammar, spelling, and punctuation by the native English speaking editor, Daniel Ingo Hefft and re-read carefully by one of the co-authors Gulzar A Bhat (PhD), who has a number of published papers and acts as a review editor for various journals. The editor focused on correcting improper language and rephrasing awkward sentences. Every effort has been made to ensure that neither the research content nor the author's intentions were altered in any way during the editing process.
