SPECIFIC COMMENTS TO AUTHORS

The authors of this well written and interesting letter, focus on the relation between inflammatory bowel disease and diabetes: several authors have already demonstrated the existence of a relationship between these two entities but a gray zone on the possible common pathogenesis still needs to be elucidate. Authors underline the possible role played by micro iota and suggest, on the basis of current literature, the possible cross reaction of medicaments used in IBD in attenuating/modifying glucose metabolism in patients with concomitant IBD and diabetes. This represent a new insigne the reserve fi be fully elucidated and studied in the next future.
