To Whom It May Concern,

This letter is to confirm that the statistical methods and results presented in the study titled ***“Early versus Late Percutaneous Endoscopic Gastrostomy (PEG) tube placement in post-stroke patients: Mortality, Predictors of Mortality, Complications, and Outcomes”*** were completed and reviewed by a member of the Biostatistics Service from the AHEAD Institute at Saint Louis University.

Sincerely,  
Noor Al-Hammadi  
Senior Biostatistician
