#### **SPECIFIC COMMENTS TO AUTHORS**

Authors reported a multifocal pseudoaneurysms case which might be caused by prior myocardial infarction in this manuscript. Left ventricular pseudoaneurysm is characterized by low morbidity but high mortality, and medical workers should pay special attention to it. Here are some suggestions: 1. Therapeutic principles of PAN should be described in the introduction or discussion. 2. Authors need presented the typical examine results such as MRI and echo, and also the therapeutic schedule after this patient admission to hospital. 3. The references should be inserted by endnote or similar software.
