SPECIFIC COMMENTS TO AUTHORS

This review is well written in English and highly informative, and remains highly important worldwide as there are millions of active COVID-19 cases and much more recovered COVID-19 cases who may have the post-COVID-19 syndrome. The authors could optimize the structure of the parts of Introduction and Conclusion.

SPECIFIC COMMENTS TO AUTHORS

There authors; greetings of the day, i hope that you are well and safe, with big interest i read your manuscipt, i found it well written, with good methodology and conclusion. My only concern is about the little samples used in most of cited studies, so if you find studies with bigger samples it will be suitable, best regards.
