## PEER-REVIEW REPORT

**Name of journal:** *World Journal of Gastrointestinal Endoscopy*

**Manuscript NO:** 76156

**Title:** Texture and color enhancement imaging for detecting colorectal adenomas: Good, but not good enough

### SPECIFIC COMMENTS TO AUTHORS

The point that authors suggested in this article seems precise and useful in the future perspective of image enhanced endoscopy.

#### **SPECIFIC COMMENTS TO AUTHORS**

The recent paper was summarized briefly and related papers were introduced. An important paper was missing (Nishizawa et al. TXI (Texture and Color Enhancement Imaging) for Serrated Colorectal Lesions. J Clin Med. 2021 Dec 27;11(1):119). The authors should introduce this paper, too.

Re: Thank you for your comment. We added the paper based on your suggestion. Please see the highlighted sections in the letter
