

STATEMENT

Purpose: Biostatistics review

Date: May 25th, 2022

Place: Cambridge, England, United Kingdom

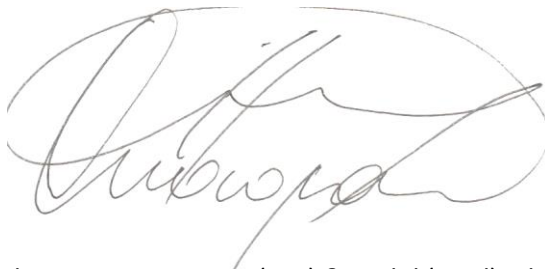

Study title: Effect of an active lifestyle on the physical frailty of liver transplant candidates

To whom it may concern,

This letter is to confirm this study has followed all ethically appropriate steps and statistical methods followed are appropriate for the purposes and the design of the study.

I am always available for any further information.

Sincerely,

A handwritten signature in black ink, appearing to read 'Ilias Oikonomou', enclosed within a faint, hand-drawn oval.

Ilias Marios Oikonomou, MD, MSc (Res) & MPhil (Med), PhDc.
