SPECIFIC COMMENTS TO AUTHORS

The manuscript presents a rigorous three-round evaluation of core orthopaedic journals using the RCA. The list of core journals in the RCA will be a useful tool for finding journals. I think the manuscript is well written, clear in its purpose and rigorous in its approach, and clearly lists 21 high quality academic journals. The manuscript also illustrates the objectives and assessment methods of the RCA. In view of the unique value of this manuscript and its strong reference value for readers, I believe that this manuscript should be published as soon as possible. I also suggest that related RCA-based analyses and journal rankings should be published in other disciplines so that this work can benefit scholars in a wider range of disciplines.

SPECIFIC COMMENTS TO AUTHORS

The Baishideng's Reference Citation Analysis (RCA) database is an objective and transparent method of evaluating the quality of academic articles, providing an objective and fair evaluation platform for readers and authors. Moreover, article types include all types of articles. I am curious about why you chose 21 high-quality academic journals, not 10 or 20. I suggest the authors can give an explanation about this question in the article.

SPECIFIC COMMENTS TO AUTHORS

I would like to congratulate you on the work seriously done. Thank you for submitting your work to WJO. This is an important topic. I would like to make minor comments. I hope to see the exact date for data collection. I mean for this statement "The functions of RCA include: Find an Article (55334324), Find a Category (254), Find a Journal (14077), Find a Scholar (632), and Find an Academic Assistant (18)"
