2. Key words: the keywords reflect the focus of the manuscript; probably, it would be better to name also the tibiocalcaneal angle.	Thanks for the valuable comment. I have added tibiocalcaneal angle in the keywords as suggested.	Key words
3. Background: The data presented in the Introduction describe well the problems studied and the importance of this research from a practical point of view. 4. Table 1 may be improved by presenting only one gender (the rest is straightforward) and compliance with bracing (only numbers for yes).	Thanks for the keen observation. The table 1 is presented as suggested.	Table 1

5. Figure 1 may be enlarged to be better viewed (there could be 2x2 instead of 4 images inline).	Thanks for the keen observation. I have improved the quality of figure.	Figure 1
6. References: The authors cited 24 papers in the field, only 5 more recent than 5 years. Maybe that aspect could be improved by adding some more recent papers	Thank you for the valuable comment.
