### **SPECIFIC COMMENTS TO AUTHORS**

The Coronavirus disease 2019 (COVID-19) pandemic has significantly impacted liver transplantation worldwide, leading to major effects on the transplant process, including pre-transplant, peri-operative, and post-transplant periods. The author pays attention to the current hot issues. The article is readable, but there are still some problems, as follows: 1. In the discussion part, the author should summarize the shortcomings and prospects of this study. 2. In addition, for the liver translation that the article focuses on, perhaps some typical pictures can be added to describe scientific problems more vividly. 3. In addition to the above problems, the language problems involved in this paper still need to be further modified to meet the readability requirements.
