

Dear Editor

Please find below our point to point answers to the Reviewers for manuscript 80550:

Reviewer #1:

Scientific Quality: Grade C (Good)

Language Quality: Grade B (Minor language polishing)

Conclusion: Minor revision

Specific Comments to Authors: The authors present their opinion on various co-morbidities associated with CKD that influence CV disease/outcomes and discuss current challenges in their management. They are correct in pointing out that although many of these co-morbidities are well known to be associated with CV disease, their management either remains inadequate or their management is not definitively associated with changes in CV outcomes. The opinion is reasonably well written.

We thank Reviewer 1 for the suggestion of minor language polishing. We addressed that in the new version

Reviewer #2:

Scientific Quality: Grade B (Very good)

Language Quality: Grade B (Minor language polishing)

Conclusion: Minor revision

Specific Comments to Authors: Very good manuscript and it was written well. You need t add "and" in third line after hypertension and before Dyslipidaemia.

We thank Reviewer 2 for the suggestion of minor language polishing. We addressed that in the new version. We corrected the manuscript as suggested.

Reviewer #3:

Scientific Quality: Grade B (Very good)

Language Quality: Grade A (Priority publishing)

Conclusion: Minor revision

Specific Comments to Authors: Dear Author/s Greetings for you. It's a nice review about cardiorenal syndrome. In summary, the subject is well explained. It would be appropriate to briefly describe the management and treatment of anemia in cardiorenal syndrome. The new molecules HIF stabilizers may also be mentioned. Best regards

We thank Reviewer 3 for the appreciation of our article. Following his suggestion we briefly discussed the management and treatment of anemia in cardiorenal syndrome and

mentioned the new molecules HIF stabilizers. It will be found in the section
“PRECISION MEDICINE THROUGH PATIENT PHENOTYPES”

Reviewer #4:

Scientific Quality: Grade B (Very good)

Language Quality: Grade B (Minor language polishing)

Conclusion: Accept (General priority)

Specific Comments to Authors: The author puts forward some strategies to solve some clinical problems of CKD, and also puts forward some suggestions for development. This manuscript has good clinical value. But I think the author can use a picture to summarize these strategies and suggestions, which will make the article clearer.

We thank Reviewer 2 for the suggestion of minor language polishing. We addressed that in the new version. We added a picture in the form of a figure which highlights the strategy proposed, ie prognostic and predictive enrichment as well as an example.

We also addressed the EDITORIAL OFFICE’S COMMENTS

(1) Science editor:

The manuscript has been peer-reviewed, and it' s ready for the first decision.

Language Quality: Grade B (Minor language polishing)

Scientific Quality: Grade B (Very good)

We are thankful for the appreciation of our study. We thank Science Editor for the suggestion of minor language polishing. We addressed that in the new version.

(2) Company editor-in-chief:

I have reviewed the Peer-Review Report, the full text of the manuscript, and the relevant ethics documents, all of which have met the basic publishing requirements of the World Journal of Cardiology, and the manuscript is conditionally accepted. I have sent the manuscript to the author(s) for its revision according to the Peer-Review Report, Editorial Office’s comments and the Criteria for Manuscript Revision by Authors. Before final acceptance, the author(s) must add a table/figure to the manuscript. Before final acceptance, when revising the manuscript, the author must supplement and improve the highlights of the latest cutting-edge research results, thereby further improving the content of the manuscript. To this end, authors are advised to apply a new tool, the RCA. RCA is an artificial intelligence technology-based open multidisciplinary citation analysis database. In it, upon obtaining search results

from the keywords entered by the author, "Impact Index Per Article" under "Ranked by" should be selected to find the latest highlight articles, which can then be used to further improve an article under preparation/peer-review/revision. Please visit our RCA database for more information at: <https://www.referencecitationanalysis.com/>.

We are thankful for the acceptance of our study. We added two figures and a table in the revised version
