

## CONSENT WAIVER

The name of study: “To study the Disease Profile of Covid-19 in patients at AIIMS, Rishikesh with focus on the demographical, clinical, laboratory, treatment, and outcome variables – a longitudinal study (also known as ‘DPC19 – AIIMS Rishikesh’ study)”

1. During the study, we will collect certain laboratory data related to your disease, history and physical examination findings, and progress notes documented in your file. The result might help us to know more about disease.
2. There are no side effects and no known, possible or probable risk in taking part in this study.
3. All the data collected will be kept confidential and only investigators would have an access and right to publish the findings in the journals. Our study will require your personal information like name, address, and some other details and your identity will be kept strictly confidential and coded while stored. During publication too, no identified data will be shared.
4. The study is being organized by the Department of General Medicine, AIIMS Rishikesh. There is no special funding for this study.

**Hence allow us to waive the consent form.**
