

## CONSORT 2010 Statement

27 Oct. 2022

To whom it may concern

All the researchers in this study have read the CONSORT 2010 Statement, and the manuscript was prepared and revised according to the CONSORT 2010 Statement. The CONSORT 2010 checklist of information is attached to the next page.

Please contact me if you have any queries.

Sincerely,

Zhaohui Deng, PHD

Department of Gastroenterology, Shanghai Children's Medical Center, Shanghai Jiao Tong University School of Medicine, Shanghai, China

## CONSORT 2010 checklist of information

| Section/Topic                    | Item No | Checklist item  | Reported on page No |
|----------------------------------|---------|---|---------------------|
| <b>Title and abstract</b>        |         |   |                     |
|                                  | 1a      | Identification as a randomised trial in the title   | Page 1              |
|                                  | 1b      | Structured summary of trial design, methods, results, and conclusions (for specific guidance see CONSORT for abstracts)   | Page 3-4            |
| <b>Introduction</b>              |         |   |                     |
| Background and objectives        | 2a      | Scientific background and explanation of rationale  | Page 5-6            |
|                                  | 2b      | Specific objectives or hypotheses   | Page 5-6            |
| <b>Methods</b>                   |         |   |                     |
| Trial design                     | 3a      | Description of trial design (such as parallel, factorial) including allocation ratio  | Page 6              |
|                                  | 3b      | Important changes to methods after trial commencement (such as eligibility criteria), with reasons  | Page 6              |
| Participants                     | 4a      | Eligibility criteria for participants   | Page 6              |
|                                  | 4b      | Settings and locations where the data were collected  | Page 6              |
| Interventions                    | 5       | The interventions for each group with sufficient details to allow replication, including how and when they were actually administered   | Page 7-9            |
| Outcomes                         | 6a      | Completely defined pre-specified primary and secondary outcome measures, including how and when they were assessed  | Page 9-10           |
|                                  | 6b      | Any changes to trial outcomes after the trial commenced, with reasons   | Page 9-10           |
| Sample size                      | 7a      | How sample size was determined  | Page 7              |
|                                  | 7b      | When applicable, explanation of any interim analyses and stopping guidelines  |                     |
| Randomisation:                   |         |   |                     |
| Sequence generation              | 8a      | Method used to generate the random allocation sequence  | Page 8-9            |
|                                  | 8b      | Type of randomisation; details of any restriction (such as blocking and block size)   | Page 9              |
| Allocation concealment mechanism | 9       | Mechanism used to implement the random allocation sequence (such as sequentially numbered containers), describing any steps taken to conceal the sequence until interventions were assigned | Page 8-9            |
| Implementation                   | 10      | Who generated the random allocation sequence, who enrolled participants, and who assigned participants to interventions   | Page 8-9            |

|  |     |   |                 |
|--|-----|---|-----------------|
| Blinding   | 11a | If done, who was blinded after assignment to interventions (for example, participants, care providers, those assessing outcomes) and how          |                 |
|  | 11b | If relevant, description of the similarity of interventions   |                 |
| Statistical methods                                  | 12a | Statistical methods used to compare groups for primary and secondary outcomes   | Page 10-11      |
|  | 12b | Methods for additional analyses, such as subgroup analyses and adjusted analyses  |                 |
| <b>Results</b>                                       |     |   |                 |
| Participant flow (a diagram is strongly recommended) | 13a | For each group, the numbers of participants who were randomly assigned, received intended treatment, and were analysed for the primary outcome    | Page 11-12      |
|  | 13b | For each group, losses and exclusions after randomisation, together with reasons  | Page 11, Fig. 1 |
| Recruitment  | 14a | Dates defining the periods of recruitment and follow-up   | Page 6          |
|  | 14b | Why the trial ended or was stopped  |                 |
| Baseline data  | 15  | A table showing baseline demographic and clinical characteristics for each group  | Table 1         |
| Numbers analysed                                     | 16  | For each group, number of participants (denominator) included in each analysis and whether the analysis was by original assigned groups           | Page 11         |
| Outcomes and estimation                              | 17a | For each primary and secondary outcome, results for each group, and the estimated effect size and its precision (such as 95% confidence interval) | Page 11-12      |
|  | 17b | For binary outcomes, presentation of both absolute and relative effect sizes is recommended   |                 |
| Ancillary analyses                                   | 18  | Results of any other analyses performed, including subgroup analyses and adjusted analyses, distinguishing pre-specified from exploratory         | Page 11-12      |
| Harms  | 19  | All important harms or unintended effects in each group (for specific guidance see CONSORT for harms)   | Page 12         |
| <b>Discussion</b>                                    |     |   |                 |
| Limitations  | 20  | Trial limitations, addressing sources of potential bias, imprecision, and, if relevant, multiplicity of analyses                                  | Page 15         |
| Generalisability                                     | 21  | Generalisability (external validity, applicability) of the trial findings   | Page 13         |
| Interpretation                                       | 22  | Interpretation consistent with results, balancing benefits and harms, and considering other relevant evidence                                     | Page 12-15      |
| <b>Other information</b>                             |     |   |                 |
| Registration   | 23  | Registration number and name of trial registry  | Page 18         |
| Protocol   | 24  | Where the full trial protocol can be accessed, if available   | Page 18-19      |
| Funding  | 25  | Sources of funding and other support (such as supply of drugs), role of funders   | Page 2          |
