

PEER-REVIEW REPORT

Name of journal: *World Journal of Gastrointestinal Surgery*

Manuscript NO: 81782

Title: Percutaneous transhepatic cholangial drainage (PTCD)-guided methylene blue for fistulotomy using dual-knife for bile duct intubation-A case report

Provenance and peer review: Unsolicited Manuscript; Externally peer reviewed

Peer-review model: Single blind

Reviewer's code: 03477763

Position: Peer Reviewer

Academic degree: MD

Professional title: Doctor

Reviewer's Country/Territory: Turkey

Author's Country/Territory: China

Manuscript submission date: 2023-01-25

SPECIFIC COMMENTS TO AUTHORS

This is a case report on the technique of inserting a biliary drainage tube using percutaneous transhepatic cholangiography (PTCD). Although I find it very interesting, I think some additional information is necessary. 1, In this case, was the cause of jaundice due to the surgery? 1, What types of cases are suitable for this technique? This question is also related to the first one, but is this technique useful for cases that are not surgical? You have to mention about this in Discussion, for readers.
