	Editorial Office's Comments	[Y]
	Science Editor: Remind Revision at 2022-12-21 08:18	
	Company Editor-in-Chief: I have reviewed the Peer-Review	
	Report, the full text of the manuscript, and the relevant ethics	
	documents, all of which have met the basic publishing requirements	
	of the World Journal of Cardiology, and the manuscript is	
	conditionally accepted. I have sent the manuscript to the author(s)	
	for its revision according to the Peer-Review Report, Editorial	
	Office's comments and the Criteria for Manuscript Revision by	
	Authors. Before final acceptance, uniform presentation should be	
2	used for figures showing the same or similar contents; for example,	
2	"Figure 1 Pathological changes of atrophic gastritis after treatment.	
	A:; B:; C:; D:; E:; F:; G:". Please provide the original	
	figure documents. Please prepare and arrange the figures using	
	PowerPoint to ensure that all graphs or arrows or text portions can	
	be reprocessed by the editor. In order to respect and protect the	
	author's intellectual property rights and prevent others from	
	misappropriating figures without the author's authorization or	
	abusing figures without indicating the source, we will indicate the	
	author's copyright for figures originally generated by the author,	
	and if the author has used a figure published elsewhere or that is	
	copyrighted, the author needs to be authorized by the previous

	publisher or the copyright holder and/or indicate the reference	
	source and copyrights. Please check and confirm whether the	
	figures are original (i.e. generated de novo by the author(s) for this	
	paper). If the picture is 'original', the author needs to add the	
	following copyright information to the bottom right-hand side of	
	the picture in PowerPoint (PPT): Copyright ©The Author(s) 2022.	
	Before final acceptance, when revising the manuscript, the author	
	must supplement and improve the highlights of the latest	
	cutting-edge research results, thereby further improving the content	
	of the manuscript. To this end, authors are advised to apply a new	
	tool, the RCA. RCA is an artificial intelligence technology-based	
	open multidisciplinary citation analysis database. In it, upon	
	obtaining search results from the keywords entered by the author,	
	"Impact Index Per Article" under "Ranked by" should be selected to	
	find the latest highlight articles, which can then be used to further	
	improve an article under preparation/peer-review/revision. Please	
	visit our RCA database for more information at:	
	https://www.referencecitationanalysis.com/.	
3	The fixed headings are copied.	[Y]
	The title concisely summarizes the main topic of the study and is	[Y]
	not too long (no more than 18 words). Words such as 'exploration',	
4	'research', 'analysis', 'observation', and 'investigation' are avoided.	
	The title does not start with 'The' and does not include any Arabic	
	numbers or uncommon abbreviations.	
5	A short running title is provided (no more than 6 words).	[Y]

The 'INTRODUCTION' section clearly describes the relevant background information for the study. Only the most relevant and current (within the past 5 years) literature is cited, with the exception of rare instances of seminal literature citations. All technical terms and/or abbreviations are explained and/or defined, with the full name of abbreviations given upon first appearance in the text and the abbreviation presented in parentheses [i.e., "computed tomography (CT)"]. First-person pronouns (e.g., 'I', 'we') are used appropriately to clearly indicate the work performed by the author(s). When weaknesses of previous studies are described in the text to highlight the innovations related to the current study, the information is presented carefully.

The 'MATERIALS AND METHODS' section clearly and accurately [Y]
describes all materials and methods used to obtain the data
presented in the article and is adequate for a reader to repeat the
study.
The 'RESULTS' section concisely describes the observational and [Y]
experimental results. Representative data and data that have
scientific significance are emphasized. Data is presented in either
the text, a table or figure (i.e., chart, diagram, graph or image), but is
not repeated among each. Information presented in the tables and
figures clearly describes the trends, meaning, and inferences.
Results described in textual form are accurate, concise and clear.
Statistical symbols are accurate. Statistical significance is expressed [Y]
as ${}^{a}P$ < 0.05, ${}^{b}P$ < 0.01 (P > 0.05 usually does not need to be denoted).
If there are other series of P values, $^{c}P < 0.05$ and $^{d}P < 0.01$ are used,
and a third series of P values is expressed as $^{\rm e}P$ < 0.05 and $^{\rm f}P$ < 0.01.
Statistical data is expressed as mean \pm SD or mean \pm SE.

	The 'DISCUSSION' section (1) describes the main purpose and	[Y]
19	hypothesis of the study; (2) summarizes the most important results;	
	(3) illustrates and explains the results (but does not simply repeat	
	the data) and draws conclusions or inferences based on the results;	
19	(4) points out the limitations of the study and their impact on the	
	results, as well as proposes further advice on future research	
	topic(s) or direction(s); and (5) describes the theoretical significance	
	and practical value of the findings.	
	The 'ACKNOWLEDGEMENTS' section expresses gratitude to any	[N]
	individuals or organizations for technical support (i.e., providing	
20	instrumentation, equipment or experimental materials, and/or	
20	assistance in experimental work), non-technical services (i.e., useful	
	inspiration, suggestions, guidance, or review), and/or any other	
	auxiliary work.	
21	The 'ARTICLE HIGHLIGHTS' section provides comments for	[Y]
21	original articles in accordance with the specified format.	
	The 'REFERENCES' section lists the references in the Vancouver	[Y]
	style. This style uses Arabic numeral in-text citations based on the	
	order of the first appearance of a source in the text. For citations	
	where the author's name is indicated in the text, a superscript	
	number should be placed following the name (i.e, "Pang et al"). For	
22	citations where no author is indicated, a superscript number should	
	be placed at the end of the sentence. Respective examples are: "Ma[1]	
	reported", "Pan et al ^[2-5] indicated"; "PCR has a high	
	sensitivity ^[6,9] ." No superscript numbers are used when the	
	reference number is described in the text; for example, "The	
	experimental method used has been described in reference [8]." The	
	style of reference citations in tables is the same as that in the text	
	(e.g., Pan et al ^[2-5] , please see reference [8]).

Journal references have been verified to ensure that there are no duplicate references and that the PMID numbers are correct. For references not yet included in PubMed: the name of Chinese journals is spelled out using Chinese Pinyin, with the first letter of each word capitalized (e.g., Shijie Huaren Xiaohua Zazhi); the name of journals in other languages are listed according to indexing information retrieved from Google. Book references are presented with all the information relevant to the electronic version. The number of cited references is appropriate for the article type, as follows: Commentary: no less than 50; Review; no less than 100; Article: no less than 30/26; Case Report and Letter to the Editor; no less than 1. The ethics-related statements are provided in accordance with the manuscript type (e.g., Manuscript NoInstitutional review board statement, Manuscript NoAnimal care and use statement, etc.). The names of the peer reviewers and the scientific editor are present at the end of the paper (e.g., P-Reviewer: Hugot D S-Editor: Wang JL). The order and numerical labeling of tables and figures is consistent with their appearance and presentation in the text. Symbols in tables (e.g., +, -, ×, *, *) correctly correspond to the definitions in the footnotes. Only one legend is provided for each multi-panel figure consisting of color graphs, black and white graphs, or line graphs that depicts data of the same theme.
