PEER-REVIEW REPORT

Name of journal: *World Journal of Gastroenterology*

Manuscript NO: 82389

Title: Changing trends in the minimally invasive surgery for chronic pancreatitis

Provenance and peer review: Invited Manuscript; Externally peer reviewed

Peer-review model: Single blind

Reviewer's code: 06490048

Position: Peer Reviewer

Academic degree: MD

Professional title: Doctor

Reviewer's Country/Territory: Pakistan

Author's Country/Territory: India

Manuscript submission date: 2022-12-17

Reviewer chosen by: AI Technique

Reviewer accepted review: 2023-01-15 15:20

Reviewer performed review: 2023-01-17 11:35

Review time: 1 Day and 20 Hours

SPECIFIC COMMENTS TO AUTHORS

Following suggestion need to be incorporated in the final version. 1. Abstract must include problem, objectives, your methodology and results achieved. 2. What is your major contribution in this field? Elaborate it in the conclusion section. 3. Write down the main problem in existing procedures at the end of the literature review? 4. Following research need to be referenced in your manuscript:

- <https://onlinelibrary.wiley.com/doi/10.1002/jcp.27281>
- <https://pubmed.ncbi.nlm.nih.gov/35549629/>
- <https://www.ncbi.nlm.nih.gov/pmc/articles/PMC8966419/>

5. simplify your methodology.

SPECIFIC COMMENTS TO AUTHORS

Pancreatic pathology, though uncommon and complex, is frequently amenable to laparoscopic intervention. This review focus on the management of chronic pancreatitis via minimally invasive surgery. The manuscript is well organized and well written. The content is of interests for readers. One concern need to been addressed. MIS for chronic pancreatitis is technical demanding, it will be better when introducing the different operations or madality, addd the related clinical research or evidence.

SPECIFIC COMMENTS TO AUTHORS

The paper focuses on the challenges, evolution, and changing trends in the minimally invasive management of chronic pancreatitis. 1. The article describes the treatment history of chronic pancreatitis pain in detail, but does not describe the pain mechanism. One or two sentences can be used to properly describe the hypothesis of various pain mechanisms. 2. Some parts of the article only describe the results of previous studies without mentioning detailed data. It is suggested to add data related to the conclusion. In general, this article has certain reading significance, which enables readers to understand the treatment of chronic pancreatitis. It provides some reference for the pain treatment of chronic pancreatitis.
