JOURNAL EDITOR-IN-CHIEF (ASSOCIATE EDITOR) COMMENTS TO AUTHORS

The first reviewer's comments were not much detail; The second reviewer provided details for each component, but the comments are like a not specific to this work since there was no figure and diagrams. Therefore, the comments "The figures, diagrams, and tables are sufficient, good quality and appropriately illustrative, with labeling of figures using arrows, asterisks, etc, and are the legends adequate and accurately reflective of the images/illustrations shown." are not fit into this work. I would suggest inviting one of potential reviewers who work in the Gynecology and Obstetrics, to check this work to see whether it is appropriately summarized, before the final decision.
