

Specific Comments To Authors: Excellent systematic review in a topic of global clinical significance Minor improvements such as a structured abstract, incorporation of key radiological/fluoroscopic/intra-operative images could enhance the educational depth of the paper. Finally, the paper needs some polishing regarding typos

We are glad the reviewers found our Systematic review interesting, relevant and well-performed.

We apologize for grammatical errors in the English language. A native English speaker reviewed the paper and made corrections throughout.

Specific Comments To Authors: Dear author, I want to congratulate you for this well-written systematic review. This is really an original material conducted with a perfect methodology. I also believe that your work will create an important reference for anyone publishing in regards to gallbladder perforation, as well as an important cite for future guidelines.

Thank you for your comments !
