SPECIFIC COMMENTS TO AUTHORS

The authors introduced the surgical methods for corrosive esophagogastric strictures, including the innovative total laparoscopic procedures in detail. Surgical manipulations for esophageal or gastric strictures were complex even for open surgeries, let alone total laparoscopic ones. From this point of view, this manuscript made us easier to learn the surgical manipulations for corrosive esophagogastric stricture comprehensively. The writing style and language organization of this manuscript were clear and brief. The elaboration of some surgical portions, the authors only mentioned one reference article or authors, I wonder if there has been only one reference article existence till now. If yes, it was all right.

SPECIFIC COMMENTS TO AUTHORS

A very good review on the complexity around benign oesophageal disorder that require major resection and nicely highlighted in good details of different approach with description of surgical technique.
