	First decision: 2023-06-01 04:52	
	Editorial Office's Comments	
	Science Editor: The manuscript has been peer-reviewed, and it's	
	ready for the first decision.	
	Company Editor-in-Chief: I recommend the manuscript to be	
	published in the World Journal of Gastrointestinal Surgery. Before	
	final acceptance, when revising the manuscript, the author must	
	supplement and improve the highlights of the latest cutting-edge	
	research results, thereby further improving the content of the	
0	manuscript. To this end, authors are advised to apply a new tool,	
2	the Reference Citation Analysis (RCA). RCA is an artificial	[Y]
	intelligence technology-based open multidisciplinary citation	
	analysis database. In it, upon obtaining search results from the	
	keywords entered by the author, "Impact Index Per Article" under	
	"Ranked by" should be selected to find the latest highlight articles,	
	which can then be used to further improve an article under	
	preparation/peer-review/revision. Please visit our RCA database	
	for more information at:	
	https://www.referencecitationanalysis.com/.	
3	The fixed headings are copied.	[Y]
	The title concisely summarizes the main topic of the study and is	
	not too long (no more than 18 words). Words such as 'exploration',	
4	'research', 'analysis', 'observation', and 'investigation' are avoided.	[Y]
	The title does not start with 'The' and does not include any Arabic	
	numbers or uncommon abbreviations.	
5	A short running title is provided (no more than 6 words).	[Y]

Telephone: +1-925-399-1568 **E-mail:** bpgoffice@wjgnet.com

The authors' full family (sur)names and full/abbreviated first	
6 names are listed on the title page and are consistent with those	[Y]
listed in the signed BPG Copyright License Agreement form.	
The 'Author contributions' passage describes the specific	
contribution(s) made by each author. The author's names are listed	
in the following format: full family (sur)name followed by	
abbreviated first and middles names.	
e.g., "Wang CL and Liang L contributed equally to this work; Wang	
7 CL, Liang L, Fu JF, Zou CC, Hong F and Wu XM designed the	[Y]
research study; Wang CL, Zou CC, Hong F and Wu XM performed	
the research; Xue JZ and Lu JR contributed new reagents and	
analytic tools; Wang CL, Liang L and Fu JF analyzed the data; and	
Wang CL, Liang L and Fu JF wrote the manuscript. All authors	
have read and approve the final manuscript."	
The 'Supported by' statement describes the source(s) of financial	
8 support and includes the corresponding identification number(s)	[N]
and program ID(s) if available, and contains no spelling errors.	
The 'Corresponding author' passage provides the corresponding	
author's full first and family (sur)names, abbreviated title (e.g., MD,	
PhD), affiliated institute's name and complete postal address	[Y]
(including zip code) and e-mail (written in all lowercase), and	
contains no spelling errors.	
The Manuscript Tracking information (i.e., Received, Peer review	
started, First decision, Revised, Accepted, Article in press, and	F3/1
Published online) are provided along with the corresponding editor	[Y]
and date for each item, and contain no spelling errors.	
The Abstract section is formatted according to the article-specific	
style (structured vs unstructured) and word count thresholds, as	[V]
follows:	[Y]
Commentary, Frontier, Diagnostic Advances, Medical Ethics,

15	The 'INTRODUCTION' section clearly describes the relevant background information for the study. Only the most relevant and current (within the past 5 years) literature is cited, with the exception of rare instances of seminal literature citations. All technical terms and/or abbreviations are explained and/or defined, with the full name of abbreviations given upon first appearance in the text and the abbreviation presented in parentheses [i.e., "computed tomography (CT)"]. First-person pronouns (e.g., 'I', 'we') are used appropriately to clearly indicate the work performed by the author(s). When weaknesses of previous studies are described in the text to highlight the innovations related to the current study, the information is presented carefully.	[Y]
16	The 'MATERIALS AND METHODS' section clearly and accurately describes all materials and methods used to obtain the data presented in the article and is adequate for a reader to repeat the study.	[Y]
17	The 'RESULTS' section concisely describes the observational and experimental results. Representative data and data that have scientific significance are emphasized. Data is presented in either the text, a table or figure (<i>i.e.</i> , chart, diagram, graph or image), but is not repeated among each. Information presented in the tables and figures clearly describes the trends, meaning, and inferences. Results described in textual form are accurate, concise and clear.	[Y]
18	Statistical symbols are accurate. Statistical significance is expressed as ${}^{a}P < 0.05$, ${}^{b}P < 0.01$ ($P > 0.05$ usually does not need to be denoted). If there are other series of P values, ${}^{c}P < 0.05$ and ${}^{d}P < 0.01$ are used, and a third series of P values is expressed as ${}^{c}P < 0.05$ and ${}^{f}P < 0.01$. Statistical data is expressed as mean \pm SD or mean \pm SE.	[Y]

The 'DISCUSSION' section (1) describes the main purpose and hypothesis of the study; (2) summarizes the most important results; (3) illustrates and explains the results (but does not simply repeat the data) and draws conclusions or inferences based on the results; (4) points out the limitations of the study and their impact on the results, as well as proposes further advice on future research topic(s) or direction(s); and (5) describes the theoretical significance and practical value of the findings. The 'ACKNOWLEDGEMENTS' section expresses gratitude to any individuals or organizations for technical support (i.e., providing instrumentation, equipment or experimental materials, and/or assistance in experimental work), non-technical services (i.e., useful inspiration, suggestions, guidance, or review), and/or any other auxiliary work. The 'ARTICLE HIGHLIGHTS' section provides comments for original articles in accordance with the specified format. The 'REFERENCES' section lists the references in the Vancouver style. This style uses Arabic numeral in-text citations based on the order of the first appearance of a source in the text, a superscript number should be placed following the name (i.e., "Pang et al"). For citations where no author is indicated, a superscript number should be placed at the end of the sentence. Respective examples are: "Mal" reported", "Pan et al" No superscript numbers are used when the reference number is described in the text; for example, "The experimental method used has been described in reference [8]." The style of reference citations in tables is the same as that in the text (e.g., Pan et al" Pal, please see reference [8]).
