

## Certificate Service Confirmation

To Whom It May Concern,

I have provided comprehensive editing services for the revised manuscript (**Injectable hydrogel made from antler mesenchyme matrix for regenerative wound healing via creating a fetal-like niche**) by Dr. Chunyi Li's team. The paper is under consideration for publication in your journal. I believe the paper is scientifically sound, and after my editing there is no further language polishing required.

Should you require any additional information, please do not hesitate to contact me.
