

Dear Reviewer 1

Thank you. I have made further revisions to the manuscript and made some minor language improvements. In order to ensure the organization and readability of the article, I have made some deletions to the text. 3. I have adjusted the quality of the pictures, thank you very much. 4. In this study, we utilized network pharmacology and molecular docking to predict the mechanism of PCRR in treating ALL. However, we did not conduct experimental validation to support our findings. Therefore, future research should include cell or animal experiments to confirm the conclusions drawn in this study.

Dear Reviewer 2

I have made some minor modifications and thank you very much for your evaluation of our manuscript
