## SPECIFIC COMMENTS TO AUTHORS

Please make the alterations listed below to your paper: 1. Changing the title of the article so that it more accurately reflects the purpose of the current study. Ensure that the new title of the paper does not exceed twenty words and contains no abbreviations, as these are among the requirements of a distinguished title for a scientific paper. 2. The study's introduction requires a great deal of work and should be divided into the following three paragraphs: a- The first paragraph should emphasize the significance of the current research. b- The second paragraph should clarify the knowledge gap that the current study aims to address. c- The third and final paragraph should focus on the research problem and how to approach it within the context of the current study's objectives. 3. The "Case Report" section is extremely brief and of very low quality in its current form. In light of this, I expect that the authors will expand this section of the paper by including more clarifications and information regarding the evolution and progression of the patient's medical condition. 4. It is only natural that the final paragraph of the discussion section be devoted to elucidating the study's strengths and shortcomings, as well as its future directions. I trust that the author(s) will make the

necessary changes in this regard. 5. Please rewrite the conclusion section of the study to clarify whether or not the research problem was resolved, i.e. whether or not the study's objectives were met. 6. I discovered that many of the cited sources are obsolete and require revision. I hope the author(s) will revise the references section by removing any irrelevant material and using only references from 2023 and five years prior. 7. Are the images used in this paper the product of the author(s) or have they been obtained from other sources? If the images are derived from other sources, please consider the property rights and rights of the third party in order to avoid potential future disputes. Good luck,
