

You are invited to participate in a research project about your personal experiences related to the COVID-19 pandemic. This online survey should take 15 minutes to complete. Participation is voluntary, and responses will be kept anonymous. You have the option to discontinue participation in the research study at any time. Submission of the survey will be interpreted as your informed consent to participate and that you affirm that you are at least 18 years of age. Some survey questions may not appear to be about COVID, but they are important to understand how people are feeling, in general.
