## SPECIFIC COMMENTS TO AUTHORS

Dear editors and authors! I would like to congratulate the team of authors and their patient on the successful resolution of the abdominal disease that has arisen. The topic is relevant for providing assistance in pediatric practice. However, what is the novelty of the described case? It is necessary to change the concept of writing a manuscript and strengthen the scientific significance of the described problem. The images are correct. References to the literature data should be updated to strengthen the Discussion section of the manuscript. Currently, it is recommended to revise the submitted manuscript and make appropriate additions.

#### **SPECIFIC COMMENTS TO AUTHORS**

Dear authors of the manuscript and editors of the article "General anesthesia with endotracheal intubation ensures the quick removal of magnetic foreign bodies: A case report", the new and revised version of the text is of high significance. The work carried out on the text has improved the scientific and linguistic style of presenting the material. Comprehensive answers to the reviewer's questions were received. Noteworthy is the unique design of the "Audio Core Tip" with musical accompaniment. A small note: references to literature sources in the text must be formatted correctly ([1], [2] , etc). Otherwise I have no additional comments.
