The Mation continuations passage accentices the specific	[Y]
contribution(s) made by each author. The author's names are listed	
in the following format: full family (sur)name followed by	
abbreviated first and middles names.	
e.g., "Wang CL and Liang L contributed equally to this work; Wang	
CL, Liang L, Fu JF, Zou CC, Hong F and Wu XM designed the	
research study; Wang CL, Zou CC, Hong F and Wu XM performed	
the research; Xue JZ and Lu JR contributed new reagents and

and program ID(s) if available, and contains no spelling errors.	
The 'Corresponding author' passage provides the corresponding	[Y]
author's full first and family (sur)names, abbreviated title (e.g., MD,

(including zip code) and e-mail (written in all lowercase), and	
contains no spelling errors.	
The Manuscript Tracking information (i.e., Received, Peer review	[Y]
started, First decision, Revised, Accepted, Article in press, and	
Published online) are provided along with the corresponding editor	
and date for each item, and contain no spelling errors.	
The Abstract section is formatted according to the article-specific	[Y]
style (structured vs unstructured) and word count thresholds, as	
follows:	
Commentary, Frontier, Diagnostic Advances, Medical Ethics,	

Minireview, Review, Therapeutics Advances, and Topic Highlight: Non-structured abstract that is no less than 200 words. Field of Vision, Case Report and Letter to the Editor: Non-structured abstract that is no less than 150 words. Research articles: Structured abstract with subsections for AIM (no more than 20 words); METHODS (no less than 80 words); RESULTS (no less than 120 words); and CONCLUSION (no more than 26 words).

The 'Key words' list provides 5-10 keywords that reflect the main [Y]	
content of the study. The first letter of each keyword is capitalized,	
and each keyword is separated by a semicolon.	
The "citation" contains authors' names and manuscript title. The	
name of the first author should be typed in bold letters; the family	
(sur) name of all authors should be typed with the first letter	
capitalized, followed by their abbreviated first and middle initials.	
For example, an article by Jae Moon Yoon, Ki Young Son, Chun Sick	
Eom, Daniel Durrance, Sang Min Park will be written as Yoon JM,	
Son KY, Eom CS, Durrance D, Park SM. Pre-existing diabetes	
mellitus increases the risk of gastric cancer: A meta-analysis. World J	
Gastroenterol 2019; In press	
The 'Core tip' provides a summary (less than 100 words) of the	
study that outlines the most innovative and important arguments	
and core contents of the paper and will serve to effectively attract	
readers.	

	The 'INTRODUCTION' section clearly describes the relevant	[Y]
	background information for the study. Only the most relevant and	
	current (within the past 5 years) literature is cited, with the	
	exception of rare instances of seminal literature citations. All	
	technical terms and/or abbreviations are explained and/or defined,	
15	with the full name of abbreviations given upon first appearance in	
15	the text and the abbreviation presented in parentheses [i.e.,	
	"computed tomography (CT)"]. First-person pronouns (e.g., 'I',	
	'we') are used appropriately to clearly indicate the work performed	
	by the author(s). When weaknesses of previous studies are	
	described in the text to highlight the innovations related to the	
	current study, the information is presented carefully.	
	The 'MATERIALS AND METHODS' section clearly and accurately	[Y]
16	describes all materials and methods used to obtain the data	
	presented in the article and is adequate for a reader to repeat the	
	study.	
	The 'RESULTS' section concisely describes the observational and	[Y]
	experimental results. Representative data and data that have	
	scientific significance are emphasized. Data is presented in either	
17	the text, a table or figure (i.e., chart, diagram, graph or image), but is	
	not repeated among each. Information presented in the tables and	
	figures clearly describes the trends, meaning, and inferences.	
	Results described in textual form are accurate, concise and clear.	
	Statistical symbols are accurate. Statistical significance is expressed	[Y]
	as ${}^{a}P$ < 0.05, ${}^{b}P$ < 0.01 (P > 0.05 usually does not need to be denoted).	
18	If there are other series of P values, $^{c}P < 0.05$ and $^{d}P < 0.01$ are used,	
	and a third series of P values is expressed as $^{\rm e}P$ < 0.05 and $^{\rm f}P$ < 0.01.	
	Statistical data is expressed as mean \pm SD or mean \pm SE.	

	The 'DISCUSSION' section (1) describes the main purpose and	[Y]
	hypothesis of the study; (2) summarizes the most important results;	
	(3) illustrates and explains the results (but does not simply repeat	
10	the data) and draws conclusions or inferences based on the results;	
19	(4) points out the limitations of the study and their impact on the	
	results, as well as proposes further advice on future research	
	topic(s) or direction(s); and (5) describes the theoretical significance	
	and practical value of the findings.	
	The 'ACKNOWLEDGEMENTS' section expresses gratitude to any	[Y]
	individuals or organizations for technical support (i.e., providing	
20	instrumentation, equipment or experimental materials, and/or	
20	assistance in experimental work), non-technical services (i.e., useful	
	inspiration, suggestions, guidance, or review), and/or any other	
	auxiliary work.	
21	The 'ARTICLE HIGHLIGHTS' section provides comments for	[Y]
21	original articles in accordance with the specified format.	
	The 'REFERENCES' section lists the references in the Vancouver	[Y]
	style. This style uses Arabic numeral in-text citations based on the	
	order of the first appearance of a source in the text. For citations	
	where the author's name is indicated in the text, a superscript	
	number should be placed following the name (i.e, "Pang et al"). For	
	citations where no author is indicated, a superscript number should	
22	be placed at the end of the sentence. Respective examples are: "Ma[1]	
	reported", "Pan et al ^[2-5] indicated"; "PCR has a high	
	sensitivity ^[6,9] ." No superscript numbers are used when the	
	reference number is described in the text; for example, "The	
	experimental method used has been described in reference [8]." The	
	style of reference citations in tables is the same as that in the text	
	(e.g., Pan et al ^[2-5] , please see reference [8]).
