

Dear Editor,

RE: Manuscript No: 88717

We would like to thank World Journal of Clinical Cases for giving us the opportunity to revise our manuscript. We thank the reviewers for their careful read and thoughtful comments on previous draft.

We have carefully taken their comments into consideration in preparing our revision, which has resulted in a paper that is clearer, more compelling, and broader. The following summarizes how we responded to reviewer comments.

Below is our response to their comments.

Revision-authors' response

Reviewer #1:

Scientific Quality: Grade B (Very good)

Language Quality: Grade B (Minor language polishing)

Conclusion: Accept (High priority)

Specific Comments to Authors: This is a very good article on three cases of Lupus Nephritis, successfully treated with the appropriate therapy. What is important is the documentation of the involvement of macrophages and podocytes in different ways according the disease stage, as documented by the repeated renal biopsies.

We have polished the manuscript in English to meet the requirements for journal publication.

Thanks for all the help.

Best wishes.

Dr liu
