

Reviewer #1

Specific Comments To Authors: please see my highlighted comment in the attached file

Dear Editor,

We thank so much you and the reviewers for reviewing our manuscript. We have now extensively revised our manuscript for all English language errors, abbreviations, etc.

The concern of reviewer 1 was why we have used only PubMed for this systematic review. We have now explained this in the limitations section of this manuscript located just above the conclusion.

Once again thank you so much for your time and consideration and we look forward to a positive response.

Best Regards,

The authors
