

PEER-REVIEW REPORT

Name of journal: *World Journal of Gastroenterology*

Manuscript NO: 89027

Title: Pathophysiology of severe gallstone pancreatitis: A new paradigm

Provenance and peer review: Invited Manuscript; Externally peer reviewed

Peer-review model: Single blind

Reviewer's code: 02542637

Position: Editorial Board

Academic degree: PhD

Professional title: Associate Professor, Chief Doctor

Reviewer's Country/Territory: Bosnia

Author's Country/Territory: Japan

Manuscript submission date: 2023-10-18

Reviewer chosen by: Jia-Ru Fan

Reviewer accepted review: 2023-12-07 23:05

Reviewer performed review: 2023-12-07 23:18

Review time: 1 Hour

Scientific quality	<input checked="" type="radio"/> Grade A: Excellent <input type="radio"/> Grade B: Very good <input type="radio"/> Grade C: Good <input type="radio"/> Grade D: Fair <input type="radio"/> Grade E: Do not publish

SPECIFIC COMMENTS TO AUTHORS

The author's way of presenting and proving the theory of two types of biliary pancreatitis is worthy of attention and even admiration. The theory that, in my opinion, he has proven through many years of scientific and practical work has even more weight after this kind of presentation through an editorial article. The term hybrid disease is particularly attractive, therefore full support for further work and I hope for the officialization of this nomenclature through reference clinical guidelines.
