Statement of Statistical Review by a Community Medicine MD Doctor

This is to certify that the statistical review of the study titled Comparative efficacy of SGLT-2 inhibitors in the management of type 2 diabetes mellitus: A real-world experience (manuscript NO.: 89337) has been conducted by me, Dr. Dhanya Jose, a qualified doctor specializing in Community Medicine. I hold a Doctor of Medicine (MD) degree in Community Medicine, with a comprehensive curriculum that includes advanced training in biomedical statistics.

The statistical review encompassed various aspects of study design, data collection methods, and data analysis. I employed rigorous statistical techniques to ensure the validity and reliability of the study's findings. My expertise in biostatistics, as acquired through the Community Medicine MD program, played a pivotal role in enhancing the scientific rigor of the research.

This statement attests to my professional competence in applying statistical methods to health-related research, contributing to the credibility and accuracy of the study results.
