

PEER-REVIEW REPORT

Name of journal: *World Journal of Clinical Cases*

Manuscript NO: 89854

Title: Bipolar hip arthroplasty using conjoined tendon preserving posterior lateral approach in treatment of displaced femoral neck fractures

Provenance and peer review: Unsolicited Manuscript; Externally peer reviewed

Peer-review model: Single blind

Reviewer’s code: 05059442

Position: Peer Reviewer

Academic degree: MD, MS

Professional title: Attending Doctor, Doctor, Researcher, Surgeon

Reviewer’s Country/Territory: Malaysia

Author’s Country/Territory: China

Manuscript submission date: 2023-11-20

Reviewer chosen by: Yu-Lu Chen

Reviewer accepted review: 2023-12-13 02:57

Reviewer performed review: 2023-12-13 03:34

SPECIFIC COMMENTS TO AUTHORS

This is a well written article regarding a modified posterior approach in performing bipolar hemiarthroplasty which has showed less incidence of dislocation. The description of the technique is well. However, in the discussion section, it is best to write about the main difference of this technique when compared to other techniques and the logic behind this approach. This way the readers would immediately understand the technique as compared to having the read the discussion about other techniques and dislocation rate.
