	Company Editor-in-Chief: I have reviewed the Peer-Review	
	Report, and full text of the manuscript, all of which have met the	
	basic publishing requirements of the World Journal of Orthopedics,	
2	and the manuscript is conditionally accepted. I have sent the	
	manuscript to the author(s) for its revision according to the	
	Peer-Review Report, Editorial Office's comments and the Criteria	
	for Manuscript Revision by Authors. When revising the manuscript,	
	it is recommended that the author supplement and improve the	

	highlights of the latest cutting-edge research results, thereby further	
	improving the content of the manuscript. To this end, authors are	
	advised to apply PubMed, or a new tool, the RCA, of which data	
	source is PubMed. RCA is a unique artificial intelligence system for	
	citation index evaluation of medical science and life science	
	literature. In it, upon obtaining search results from the keywords	
	entered by the author, "Impact Index Per Article" under "Ranked	
	by" should be selected to find the latest highlight articles, which can	
	then be used to further improve an article under	
	preparation/peer-review/revision. Please visit our RCA database	
	for more information at:	
	https://www.referencecitationanalysis.com/, or visit PubMed at:	
	https://pubmed.ncbi.nlm.nih.gov/.

	The title will concisely summarize the main topic of the study,	
	being not overly long (no more than 18 words). Words such as	
4	'exploration', 'research', 'analysis', 'observation', and 'investigation'	[Y]
	are to be avoided. The title should not start with 'A', 'An', or 'The'	
	and will not include any Arabic numbers or abbreviations.	
5	A short running title is provided (no more than 6 words).	[Y]
	The authors' full family (sur)names and full/abbreviated first	
6	names are listed on the title page and are consistent with those	[Y]
	listed in the signed Copyright License Agreement form.	

111 Futural contribution package describes the specific contribution(s) made by each author. The author's names are listed in the following format: full family (sur)name followed by abbreviated first and middles names. e.g., "Wang CL and Liang L contributed equally to this work; Wang 7 CL, Liang L, Fu JF, Zou CC, Hong F and Wu XM designed the research study; Wang CL, Zou CC, Hong F and Wu XM performed the research; Xue JZ and Lu JR contributed new reagents and analytic tools; Wang CL, Liang L and Fu JF wrote the manuscript. 	The 'Key words list' will provide 5-10 keywords that reflect the	
	main content of the study. Please do not use abbreviations for the	
12	keywords (e.g. ulcerative colitis, not UC). The first letter of each	[Y]
	keyword will be capitalized, and each keyword will be separated by	
	a semicolon.	
	The "citation" contains authors' names and manuscript title. The	
	name of the first author should be typed in bold letters; the family	
	(sur) name of all authors should be typed with the first letter	
	capitalized, followed by their abbreviated first and middle initials.	
13	For example, an article by Jae Moon Yoon, Ki Young Son, Chun Sick	[Y]
	Eom, Daniel Durrance, Sang Min Park will be written as Yoon JM,

	The Core tip is a short paragraph that is independent of the content	
	of the Abstract. The 'Core tip' will provide a summary of the study	
14	that outlines the most innovative and important arguments. This	[Y]
	section should be less than 100 words.

15	The 'INTRODUCTION' section clearly describes the relevant background information for the study. Only the most relevant and current (within the past 5 years) literature is cited, with the exception of rare instances of seminal literature citations. All technical terms and/or abbreviations are explained and/or defined, with the full name of abbreviations given upon first appearance in the text and the abbreviation presented in parentheses [<i>i.e.</i> , "computed tomography (CT)"]. First-person pronouns (<i>e.g.</i> , 'T, 'we') are used appropriately to clearly indicate the work performed by the author(s). When weaknesses of previous studies are described in the text to highlight the innovations related to the	[Y]
	current study, the information is presented carefully.	
16	The 'MATERIALS AND METHODS' section clearly and accurately describes all materials and methods used to obtain the data presented in the article and is adequate for a reader to repeat the study.	[Y]
17	The 'RESULTS' section concisely describes the observational and experimental results. Representative data and data that have scientific significance are emphasized. Data is presented in either the text, a table or figure (<i>i.e.</i> , chart, diagram, graph or image), but is not repeated among each. Information presented in the tables and figures clearly describes the trends, meaning, and inferences. Results described in textual form are accurate, concise and clear.	[Y]
18	Statistical symbols are accurate. Statistical significance is expressed as ${}^{a}P < 0.05$, ${}^{b}P < 0.01$ ($P > 0.05$ usually does not need to be denoted). If there are other series of P values, ${}^{c}P < 0.05$ and ${}^{d}P < 0.01$ are used, and a third series of P values is expressed as ${}^{e}P < 0.05$ and ${}^{f}P < 0.01$. Statistical data is expressed as mean ± SD or mean ± SE.	[Y]

	-	
	The 'DISCUSSION' section (1) describes the main purpose and	
19	hypothesis of the study; (2) summarizes the most important results;	
	(3) illustrates and explains the results (but does not simply repeat	
	the data) and draws conclusions or inferences based on the results;	[Y]
17	(4) points out the limitations of the study and their impact on the	[1]
	results, as well as proposes further advice on future research	
	topic(s) or direction(s); and (5) describes the theoretical significance	
	and practical value of the findings.	
	The 'ACKNOWLEDGEMENTS' section expresses gratitude to any	
	individuals or organizations for technical support (i.e., providing	
20	instrumentation, equipment or experimental materials, and/or	D.T.
20	assistance in experimental work), non-technical services (<i>i.e.</i> , useful	[N]
	inspiration, suggestions, guidance, or review), and/or any other	
	auxiliary work.	
	The 'REFERENCES' section lists the references in the Vancouver	
	style. This style uses Arabic numeral in-text citations based on the	
	order of the first appearance of a source in the text. For citations	
	where the author's name is indicated in the text, a superscript	
	number should be placed following the name (<i>i.e.,</i> "Pang <i>et al</i> "). For	
	citations where no author is indicated, a superscript number should	[Y]
22	be placed at the end of the sentence. Respective examples are: "Ma ^[1]	
	reported", "Pan et al ^[2-5] indicated"; "PCR has a high	
	sensitivity ^[6,9] ." No superscript numbers are used when the	
	reference number is described in the text; for example, "The	
	experimental method used has been described in reference [8]." The	
	style of reference citations in tables is the same as that in the text	
	(<i>e.g.,</i> Pan <i>et al</i> ^[2-5] , please see reference [8]).	

	References have been edited by Auto-Analyser. Journal references	
	have been verified to ensure that there are no duplicate references	
	and that the PMID numbers are correct. For references not yet	
	included in PubMed: the name of Chinese journals is spelled out	
23	using Chinese Pinyin, with the first letter of each word capitalized	[Y]

27	footnotes. Only one legend is provided for each multi-panel figure	[V]
	consisting of color graphs, black and white graphs, or line graphs	[Y]
	that depicts data of the same theme. For example: Figure 1	
	Pathological changes in atrophic gastritis tissue before and after	
	treatment. A:; B:; C:; D:; E:; F:	
28	The original figure documents have been provided. The figures	[Y]

	have been arranged using PowerPoint to ensure that all graphs or	
	arrows or text portions can be reprocessed. Split pictures include	
	flow charts, line graphs, histograms, and graphs including text.	
	Unsplit pictures include meta-analysis diagrams, PCR amplification	
	curves, and survival curves.	
	Standard three-line tables have been provided, that is, only the top	
	line, bottom line, and column line are displayed, while other table	
29	lines are hidden. The contents of each cell in the table should	[Y]
	conform to the editing specifications, and the lines of each row or	
	column of the table should be aligned.	
20	The author(s) highlighted the changes made to the manuscript	
30	according to the peer-reviewers' comments.	[Y]
01	The responses to the peer-reviewers' comments are consistent with	D.a.
31	the changes made to the manuscript.	[Y]
	A CrossCheck investigation (an effective tool for detecting unoriginal	
	content, enabling our editors to preserve the journal's integrity and	
	the authors' copyright) has been performed for the manuscript via	
	the website: <u>http://www.ithenticate.com/</u> . The results document	
	contains the following information for the manuscript: "Name of	
32	journal", "Manuscript No.", "Columns", "Title" and "Author list".	[Y]
	The Figure of the <i>CrossCheck</i> results is saved in PNG format (.png)	
	at 1440 × 680 pixel resolution. The PDF of the <i>CrossCheck</i> results has	
	been saved under the file name: manuscript No CrossCheck report	
	(e.g., 870-CrossCheck report). The Google searches have also been	
	performed to further ensure publication of original content.	
	The revised manuscript is provided (file name: Manuscript	
	NoReview; <i>e.g.,</i> 870- Review).	
33	The letter of peer-reviewers' comments is provided (file name:	[Y]
	Manuscript NoPeer-review(s); e.g., 870-Peer-review(s)).	
	The response letter is provided (file name: Manuscript
