	Authors: Ernesto Sabath	
	Reviewer code: 05870203	
	First decision: 2023-12-31 07:50	
	Editorial Office's Comments	[Y]
	Science Editor: Remind Revision at 2024-01-08 08:21	
	Company Editor-in-Chief: I have reviewed the Peer-Review	
	Report, full text of the manuscript, all of which have met the basic	
	publishing requirements of the World Journal of Nephrology, and	
	the manuscript is conditionally accepted. I have sent the manuscript	
	to the author(s) for its revision according to the Peer-Review Report,	
	Editorial Office's comments and the Criteria for Manuscript	
	Revision by Authors. When revising the manuscript, it is	
	recommended that the author supplement and improve the	
2	highlights of the latest cutting-edge research results, thereby further	
2	improving the content of the manuscript. To this end, authors are	
	advised to apply PubMed, or a new tool, the Reference Citation	
	Analysis (RCA), of which data source is PubMed. RCA is a unique	
	artificial intelligence system for citation index evaluation of medical	
	science and life science literature. In it, upon obtaining search	
	results from the keywords entered by the author, "Impact Index Per	
	Article" under "Ranked by" should be selected to find the latest	
	highlight articles, which can then be used to further improve an	
	article under preparation/peer-review/revision. Please visit our	
	RCA database for more information at:	
	https://www.referencecitationanalysis.com/, or visit PubMed at:	

	https://pubmed.ncbi.nlm.nih.gov/.	
3	The fixed headings are copied.	[Y]
	The title concisely summarizes the main topic of the study and is	[Y]
	not too long (no more than 18 words). Words such as 'exploration',	
4	'research', 'analysis', 'observation', and 'investigation' are avoided.	
	The title does not start with 'The' and does not include any Arabic	
	numbers or uncommon abbreviations.	
5	A short running title is provided (no more than 6 words).	[Y]
	The authors' full family (sur)names and full/abbreviated first	[Y]
6	names are listed on the title page and are consistent with those	
	listed in the signed BPG Copyright License Agreement form.	
	The 'Author contributions' passage describes the specific	[Y]
	contribution(s) made by each author. The author's names are listed	
	in the following format: full family (sur)name followed by	
	abbreviated first and middles names.	
	e.g., "Wang CL and Liang L contributed equally to this work; Wang	
7	CL, Liang L, Fu JF, Zou CC, Hong F and Wu XM designed the	
	research study; Wang CL, Zou CC, Hong F and Wu XM performed	
	the research; Xue JZ and Lu JR contributed new reagents and	
	analytic tools; Wang CL, Liang L and Fu JF analyzed the data; and	
	Wang CL, Liang L and Fu JF wrote the manuscript. All authors	
	have read and approve the final manuscript."	
	The 'Supported by' statement describes the source(s) of financial	
8	support and includes the corresponding identification number(s)	[N]
	and program ID(s) if available, and contains no spelling errors.	
	The 'Corresponding author' passage provides the corresponding	[Y]
	author's full first and family (sur)names, abbreviated title (e.g., MD,	
9	PhD), affiliated institute's name and complete postal address	
	(including zip code) and e-mail (written in all lowercase), and	
	contains no spelling errors.

The Manuscript Tracking information (i.e., Received, Peer review started, First decision, Revised, Accepted, Article in press, and Published online) are provided along with the corresponding editor and date for each item, and contain no spelling errors.  The Abstract section is formatted according to the article-specific style (structured vs unstructured) and word count thresholds, as follows:  Commentary, Frontier, Diagnostic Advances, Medical Ethics, Minireview, Review, Therapeutics Advances, and Topic Highlight: Non-structured abstract that is no less than 200 words.  Field of Vision, Case Report and Letter to the Editor: Non-structured abstract that is no less than 150 words.  Research articles: Structured abstract with subsections for AIM (no more than 20 words); METHODS (no less than 80 words); RESULTS (no less than 120 words); and CONCLUSION (no more than 26 words).  The 'Key words' list provides 5-10 keywords that reflect the main content of the study. The first letter of each keyword is capitalized, and each keyword is separated by a semicolon.  The "citation" contains authors' names and manuscript title. The name of the first author should be typed in bold letters; the family (sur) name of all authors should be typed with the first letter capitalized, followed by their abbreviated first and middle initials.  For example, an article by Jae Moon Yoon, Ki Young Son, Chun Sick Eom, Daniel Durrance, Sang Min Park will be written as Yoon JM, Son KY, Eom CS, Durrance D, Park SM. Pre-existing diabetes mellitus increases the risk of gastric cancer: A meta-analysis. World J Gastroenterol 2019; In press  The 'Core tip' provides a summary (less than 100 words) of the study that outlines the most innovative and important arguments

	and core contents of the paper and will serve to effectively attract	
	readers.	
	The 'INTRODUCTION' section clearly describes the relevant	[Y]
	background information for the study. Only the most relevant and	
	current (within the past 5 years) literature is cited, with the	
	exception of rare instances of seminal literature citations. All	
	technical terms and/or abbreviations are explained and/or defined,	
15	with the full name of abbreviations given upon first appearance in	
13	the text and the abbreviation presented in parentheses [i.e.,	
	"computed tomography (CT)"]. First-person pronouns (e.g., 'I',	
	'we') are used appropriately to clearly indicate the work performed	
	by the author(s). When weaknesses of previous studies are	
	described in the text to highlight the innovations related to the	
	current study, the information is presented carefully.	
	The 'MATERIALS AND METHODS' section clearly and accurately	
16	describes all materials and methods used to obtain the data	[NI]
16	presented in the article and is adequate for a reader to repeat the	[ N ]
	study.	
	The 'RESULTS' section concisely describes the observational and	
	experimental results. Representative data and data that have	
	scientific significance are emphasized. Data is presented in either	
17	the text, a table or figure (i.e., chart, diagram, graph or image), but is	[N]
	not repeated among each. Information presented in the tables and	
	figures clearly describes the trends, meaning, and inferences.	
	Results described in textual form are accurate, concise and clear.	
18	Statistical symbols are accurate. Statistical significance is expressed	
	as ${}^{\rm a}P$ < 0.05, ${}^{\rm b}P$ < 0.01 ( $P$ > 0.05 usually does not need to be denoted).	
	If there are other series of $P$ values, $^{c}P < 0.05$ and $^{d}P < 0.01$ are used,	[Y]
	and a third series of $P$ values is expressed as $^{\rm e}P$ < 0.05 and $^{\rm f}P$ < 0.01.	
	Statistical data is expressed as mean ± SD or mean ± SE.

<b>_</b>			
	The 'DISCUSSION' section (1) describes the main purpose and		
	hypothesis of the study; (2) summarizes the most important results;		
	(3) illustrates and explains the results (but does not simply repeat		
10	the data) and draws conclusions or inferences based on the results;	[NI]	
19	(4) points out the limitations of the study and their impact on the	[ N ]	
	results, as well as proposes further advice on future research		
	topic(s) or direction(s); and (5) describes the theoretical significance		
	and practical value of the findings.		
	The 'ACKNOWLEDGEMENTS' section expresses gratitude to any		
	individuals or organizations for technical support (i.e., providing		
20	instrumentation, equipment or experimental materials, and/or		
20	assistance in experimental work), non-technical services (i.e., useful	[ N ]	
	inspiration, suggestions, guidance, or review), and/or any other		
	auxiliary work.		
	The 'ARTICLE HIGHLIGHTS' section provides comments for	[NI]	
21	original articles in accordance with the specified format.	[N]	
	The 'REFERENCES' section lists the references in the Vancouver	[Y]	
	style. This style uses Arabic numeral in-text citations based on the		
	order of the first appearance of a source in the text. For citations		
	where the author's name is indicated in the text, a superscript		
	number should be placed following the name (i.e, "Pang et al"). For		
	citations where no author is indicated, a superscript number should		
22	be placed at the end of the sentence. Respective examples are: "Ma <sup>[1]</sup>		
	reported", "Pan et al <sup>[2-5]</sup> indicated"; "PCR has a high		
	sensitivity <sup>[6,9]</sup> ." No superscript numbers are used when the		
	reference number is described in the text; for example, "The		
	experimental method used has been described in reference [8]." The		
	style of reference citations in tables is the same as that in the text		
	(e.g., Pan et al <sup>[2-5]</sup> , please see reference [8]).		
-			

	Journal references have been verified to ensure that there are no	[Y]
	duplicate references and that the PMID numbers are correct. For	
	references not yet included in PubMed: the name of Chinese	
23	journals is spelled out using Chinese Pinyin, with the first letter of	
23	each word capitalized (e.g., Shijie Huaren Xiaohua Zazhi); the name of	
	journals in other languages are listed according to indexing	
	information retrieved from Google. Book references are presented	
	with all the information relevant to the electronic version.	
	The number of cited references is appropriate for the article type, as	[Y]
	follows:	
24	Commentary: no less than 50;	
24	Review: no less than 100;	
	Article: no less than 30/26;	
	Case Report and Letter to the Editor: no less than 1.	
	The ethics-related statements are provided in accordance with the	[Y]
25	manuscript type (e.g., Manuscript NoInstitutional review board	
	statement, Manuscript NoAnimal care and use statement, etc.).	
	The names of the peer reviewers and the scientific editor are present	[Y]
26	at the end of the paper (e.g., P-Reviewer: Hugot D S-Editor: Wang	
	JL).	
	The order and numerical labeling of tables and figures is consistent	
	with their appearance and presentation in the text. Symbols in	
	tables (e.g., +, -, $\times$ , $\div$ , *) correctly correspond to the definitions in the	
27	footnotes. Only one legend is provided for each multi-panel figure	[NI]
27	consisting of color graphs, black and white graphs, or line graphs	[ N ]
	that depicts data of the same theme. For example: Figure 1	
	Pathological changes in atrophic gastritis tissue before and after	
	treatment. A:; B:; C:; E:; F:	
28	Split pictures include flow charts, line graphs, histograms, and	[Y]
	graphs including text. Unsplit pictures include meta-analysis	

	diagrams, PCR amplification curves, and survival curves.	
	The author(s) highlighted the changes made to the manuscript	[Y]
29	according to the peer-reviewers' comments.	
	The responses to the peer-reviewers' comments are consistent with	[Y]
30	the changes made to the manuscript.	
		[Y]
	The revised manuscript is provided (file name: Manuscript	[+]
	NoReview; e.g., 870- Review).	
31	The letter of peer-reviewers' comments is provided (file name:	
	Manuscript NoPeer-review(s); e.g., 870-Peer-review(s)).	
	The response letter is provided (file name: Manuscript	
	NoAnswering reviewers; e.g., 870-Answering reviewers).	
	The related ethics and relevant documents are provided, such as (1)	[Y]
	Approved grant application form(s) or funding agency copy of any	
	approval document(s) (file name: Manuscript NoGrant application	
	form(s)); (2) Biostatistics review certificate (file name: Manuscript	
	NoBiostatistics statement); (3) Conflict-of-interest statement (file	
	name: Manuscript NoConflict-of-interest statement); (4) Clinical	
22	trial registration statement (file name: Manuscript NoClinical trial	
32	registration statement); (5) Institutional review board approval form	
	or document (file name: Manuscript NoInstitutional review board	
	statement); (6) Institutional animal care and use committee	
	approval form or document (file name: Manuscript	
	NoInstitutional animal care and use committee statement), and (7)	
	Signed informed consent form(s) or document(s) (file name:	
	Manuscript NoInformed consent statement).	
33	All authors signed the BPG Copyright license agreement form (file	[Y]
	name: Manuscript NoCopyright license agreement; <i>e.g.</i> ,	
	870-Copyright license agreement).	
34	The language certificate provided by authors who are non-native	[Y]
	speakers of English meets the BPG requirements (file name:	-

	Manuscript NoLanguage certificate; e.g., 870-Language certificate).	
	The photos licensed in the Agreement for Use of Personal Photos	[Y]
		r + 1
35	are consistent with those in the paper (file name: Manuscript	
	NoAgreement for use of personal photos; e.g., 870-Agreement for	
	use of personal photos).	
	This document (Checklist of Responsibilities for Scientific Editors)	[Y]
36	has been saved under the file name: manuscript NoScientific	
	editor work list (e.g., 870-Scientific editor work list).	
	A CrossCheck investigation (an effective tool for detecting unoriginal	[Y]
	content, enabling our editors to preserve the journal's integrity and	
	the authors' copyright) has been performed for the manuscript via	
	the website: http://www.ithenticate.com/. The results document	
	contains the following information for the manuscript: "Name of	
37	journal", "Manuscript No.", "Columns", "Title" and "Author list".	
	The Figure of the <i>CrossCheck</i> results is saved in JPEG format (.jpg) at	
	$1440 \times 680$ pixel resolution. The PDF of the <i>CrossCheck</i> results has	
	been saved under the file name: manuscript No CrossCheck report	
	(e.g., 870-CrossCheck report). The Google searches have also been	
	performed to further ensure publication of original content.	
	The text of the manuscript is typed in Book Antiqua font, 12 pt, with	[Y]
38	1.5 line spacing.	
	The primary responsibilities of our scientific editors include carefully	y checking the
Responsibilities	entire manuscript and all accompanying materials for: (1) errors in spelling,	
of scientific	grammar, punctuation and wording; (2) suitability of tables, figures, figure data and	
	legends; (3) accurate and appropriate presentation of symbols (e.g. +, -, ×, ÷, %, *) in	
editors	tables and figures; and (4) complete and comprehensive revision of the manuscript	
	according to the reviewers' comments.	
	according to the reviewers confinents.	

	Manuscript reception and registration→Initial review by scientific editor→Peer
	review→End of peer review→First round of meeting evaluation→To be
	accepted→Revision by the author(s)→Second round of meeting evaluation→To be
	accepted/revised/rejected→Final review by the Editor-in-Chief (final quality
Publication	control for academic content and language quality)→Final acceptance and charging
process	of publication fee→Language editing→Production→Proofreading by scientific
	editor→Proofreading by deputy editor→Final review by Editor-in-Chief→Release
	of online open-access papers in electronic form on the BPG website-Release of
	online papers on PubMed Central—Delivery of high-quality PDF reprints to the
	author(s)→End of the publication process.
	<sup>1</sup> Ethics and Relevant Document Handling Time
	For the checking of the ethics and relevant document, the editing fee should be
	calculated independently to the Scientific Editor. The handling time of the ethics
Notes	and relevant documents for clinical and basic researches is calculated as 3 hours, for
Notes	case reports and other types of manuscript is calculated as 2 hours.
	If any errors are found in ethics and relevant document after a manuscript is
	published, the Scientific Editor's one day Welfare provided by the Baishideng
	Publishing Group will be deducted.
