Re: Manuscript for Review Article 91528
Human – Artificial Intelligence Interaction in Gastrointestinal Endoscopy

Dear Editor

Thank you for your comments on the abovenamed manuscript. All three authors are native English speakers and I note that the language quality of our manuscript received an A grade from the peer reviewer and from the Academic Editor. In light of this, I trust we do not need to engage the services of a professional English language editing company.

Faithfully

John R Campion MB BCH BAO MSc MA MRCP
Clinical Research Fellow and Medical Doctor
