The manuscript has been improved according to the suggestions of reviewers:

1 Format has been updated

2 Revision has been made according to the suggestions of the reviewer

(1) I discussed about diffusion-weighted MR imaging. I agreed with editor. LEC showed high intense signal in the central part and iso-intense in the periphery.

(2) I changed imaging findings. I arranged all the figures according to each patient.

3 References and typesetting were corrected

Thank you again for publishing our manuscript in the *World Journal of Gastroenterology*.

Sincerely yours,
