

ANSWERING REVIEWERS

11.06.2014

Dear Editor,

Please find enclosed the edited manuscript in Word format (file name: 10572-review.doc).

Title: The influence of high and low volume liver surgery in gallbladder carcinoma

Author: Thorsten Oliver Goetze, Vittorio Paolucci

Name of Journal: *World Journal of Gastroenterology*

ESPS Manuscript NO: 10572

The manuscript has been improved according to the suggestions of reviewers:

1 Format has been updated and proven by American Journal Experts (see certificate)

2 Revision has been made according to the suggestions of the reviewer

(1) Title has been shortened

(2) Abstract has been shortened and adapted according to standards of journal and the reviewers

(3) The references have been reformatted. All the reference numbers are now in superscript with square brackets. Also we have added the PubMed citation numbers and DOI (or pii) citation to the reference list and have listed all authors. Therefore the terms et al. have been canceled.

For those references that have not been indexed by PubMed, a printed copy of the first page has been submitted (Ref. no. 28).

3 The Figures 1-4 in form of decomposable Power-POINT graphs have been added (additionally), so that the fonts and lines can be edited or moved easily.

4 Finally the COMMENT part including Background, Research frontiers, Innovations and breakthroughs, Applications, Terminology and Peer review has been added.

Thank you again for publishing our manuscript in the *World Journal of Gastroenterology*.

Sincerely yours,

A handwritten signature in grey ink that reads 'Th. Goetze'.
