Dear Editor,

Please find enclosed the edited manuscript in Word format (file name: WJR_Manuscript no.10578 corrected.doc).

Title: PERCUTANEOUS THROMBIN EMBOLIZATION OF A PANCREATICO-DUODENAL ARTERY PSEUDOANEURYSM AFTER FAILING OF THE ENDOVASCULAR TREATMENT

Author: Giulio Barbiero, Michele Battistel, Ana Susac, Diego Miotto

Name of Journal: *World Journal of Radiology*

ESPS Manuscript NO: 10578

The manuscript has been improved according to the suggestions of reviewers:

1 Format has been updated

2 Revision has been made according to the suggestions of the reviewers:

– **Reviewer 01560721:**

- 1) we described in the text the possible adverse effects of percutaneous thrombin embolization and we precised that in this procedure no adverse effects occurred;
- 2) unfortunately color-Doppler US images before the procedure are not available because these images were not stored nor sent to PACS; the only color-Doppler US images stored and sent to PACS were acquired after the procedure;
- 3) axial contrast-enhanced CTs showing pancreatico-duodenal artery pseudoaneurysm before and after the treatment were performed by intravenous injection of contrast media and this was specified in figure legends;
- 4) we deleted the sentences about 2 new agents (Onyx and Cardiatris) used for endovascular treatment of aneurysms and pseudoaneurysms;
- 5) we added columns of data such as age, gender, size of pseudoaneurysms and adverse effects of this procedures in Table 1;
- 6) we corrected some spell mistakes in the Manuscript.

– **Reviewer 01482015:**

- 1) we corrected some words typed errors highlighted in yellow;
- 2) we mentioned possible adverse effects following thrombin injection such as visceral artery occlusion, distal embolization and immunological reactions.

Thank you again for publishing our manuscript in the *World Journal of Radiology*.

Sincerely yours,

A handwritten signature in blue ink, appearing to read 'Giulio Barbiero'.
