

## ANSWERING REVIEWERS

June 8, 2014

Dear Editor,

Please find enclosed the edited manuscript in Word format (file name: 10636-revised.doc).

**Title:** REVIEW OF TUMORAL CALCINOSIS: A RARE CLINICO-PATHOLOGICAL ENTITY

**Author:** Ibrahim Fathi, Mahmoud Sakr

**Name of Journal:** *World Journal of Clinical Cases.*

**ESPS Manuscript NO:** 10636

The manuscript has been improved according to the suggestions of reviewers:

1 Inquiry about experience and choice of the topic: We were confronted by several cases of tumoral calcinosis in the previous years. A case report of two challenging cases with this condition is under consideration for publication meantime. The reason behind choosing this topic is the limited knowledge available to many physicians regarding this condition and the unsettled controversy regarding the management of this disease.

2 Schematic diagrams: Two schematic diagrams have been added describing the pathogenesis, diagnostic and treatment approach of tumoral calcinosis.

Thank you again for publishing our manuscript in the *World Journal of Clinical Cases.*

Sincerely yours,

A handwritten signature in blue ink, appearing to read 'Mahmud Sakr', with a long horizontal flourish extending to the right.

Mahmud Sakr, MD, PhD, FACS
