

June 12, 2014

Dear Editor,

Please find enclosed the edited manuscript in Word format (file name: 10930-review.doc)

Title: Enterolithiasis

Authors: Grigoriy E. Gurvits, Gloria Lan

Name of Journal: *World Journal of Gastroenterology*

ESPS Manuscript No: 10930

We would like to thank reviewers for their comments.

The manuscript has been improved according to the suggestions of reviewers:

Reviewer #1: Thank you for your review. It would not be allowed to publish figures from another article, therefore, figures are not included.

Reviewer#2: Thank you for your review. We explain that treatment of Crohn's disease is important in enterolithiasis, it may help prevention of stones and passage of smaller asymptomatic stones. However, fibrosing stricture is not amendable to medical therapy and can be dealt either endoscopically or surgically.

Reviewer#3: Thank you for your review. No comments were raised.

Thank you again for publishing our manuscript in the *World Journal of Gastroenterology*

Sincerely yours,

Grigoriy E. Gurvits, MD, FACP, FACG

Gloria Lan, MD
