

Manuscript submitted by non-native speakers of English

The authors declare that the language of the manuscript number: 10957
(Does manual thrombus aspiration help optimize stent implantation in ST-segment
elevation myocardial infarction?), submitted to World Journal of Cardiology as Original
Article, has reached Grade A and could be published without grammatical modifications.
This manuscript does not require the submission of a recommendation letter of an
English language editing company.

Best Regards,

Dr. Diego Fernández-Rodríguez

Signature:

A handwritten signature in black ink, enclosed within a rectangular box. The signature is stylized and appears to read 'Diego'. It features a large, looping initial 'D' followed by a series of connected, fluid strokes that form the rest of the name. A long, horizontal line extends from the bottom of the signature across the width of the box.
