
June 21, 2014

Dear Editor,

Please find enclosed the edited manuscript in Word format (file name: 11330-Review.doc).

Title: *Helicobacter*, gamma-glutamyltransferase and cancer : further intriguing connections.

Author: Maria Franzini, Alessandro Corti, Vanna Fierabracci, Alfonso Pompella

Name of Journal: *World Journal of Gastroenterology*

ESPS Manuscript NO: 11330-Review

The manuscript has been improved according to the suggestions of reviewers:

1 Gamma-glutamyltransferase actually has no application to date in clinical studies relating to gastric cancer. Our Letter indeed suggests that the topic is deserving attention in future investigations. A sentence has been introduced in the text (blue color) to remark this fact.

2 General format, references, DOI codes and typesetting were corrected according to the instructions provided.

Thank you again for publishing our manuscript in the *World Journal of Gastroenterology*.

Sincerely yours,

Prof. A. Pompella
